

QuickSafe® next-generation surge protection device Hidden hero for electrical systems

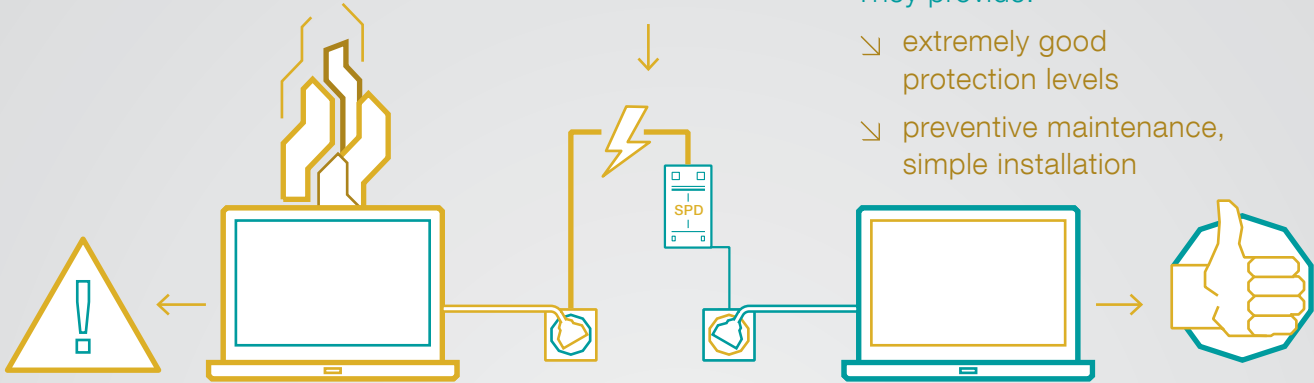

Surge protection devices (SPDs)

SPDs protect electrical systems and equipment against transitory surges in the electrical grid.

They provide:

- ▾ extremely good protection levels
- ▾ preventive maintenance, simple installation

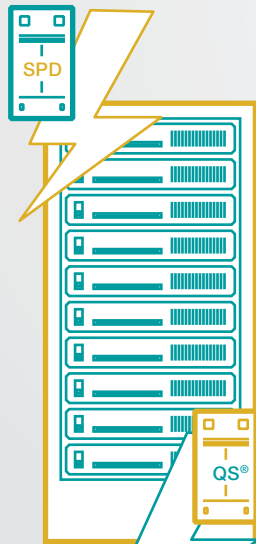

QuickSafe vs standard SPD

Standard SPD

- ▾ limited life span
- ▾ the protection time is variable and unpredictable

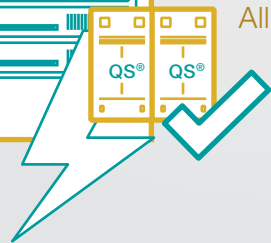

The equipment is left unprotected.

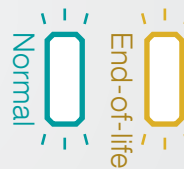

QuickSafe

- ▾ optional safety reserve system
- ▾ the quality of service and equipment life span is increased

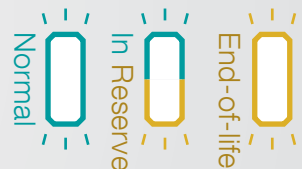

All systems are kept running.

End-of-life indicator: **standard SPD**

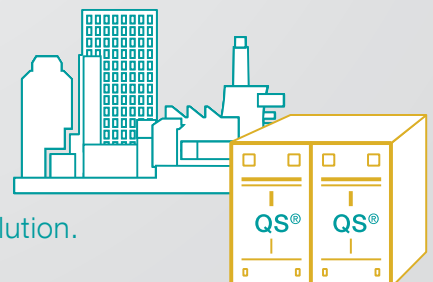

End-of-life indicator: **with safety reserve system**

With QuickSafe

The benefits are huge and costs are little more than a standard solution.
