

Case Extends and Upgrades its Skid Steer And Compact Track Loader Range

Paris, 20 April 2015

Case Construction Equipment has expanded its skid steer loader and compact track loader line-up with four new models to widen further the variety of requirements its offering is able to meet, and upgraded one model, further increasing its performance and introducing Tier 4 Final technology. With the new additions, the range now counts nine skid steer loaders and four compact track loaders that stand out for their powerful performance, exceptional visibility and operator comfort, as well as the outstanding stability that derives from the long wheelbase and the optimized weight distribution, 30% on the front and 70% on the rear.

More Productivity, Less Emissions and Costs

All five models feature powerful 3.4 litre turbo engines and the maintenance-free Tier 4 Final solution developed by FPT Industrial. This proven technology delivers outstanding performance, with up to 10% more power. It requires no additional fluids or particulate filter, so uptime is maximized while maintenance and operating costs are minimized. The highly efficient engine's low fuel consumption cuts operating costs even further.

The new skid steer and compact track loaders can handle with ease the most demanding jobs: the higher torque and breakout force result in faster cycle times and consequently higher productivity. Both standard and High Flow configurations deliver higher hydraulic flow for faster moving attachments. For example, the SR210 that replaces the SR200 delivers 8% more flow on the standard auxiliary circuit and 6% more on the high flow configuration, that is 92 litres/minute and 123 litres/minute respectively.

Additional Models for a Wider Variety of Applications

Three models are entirely new to the line-up, which now is able to meet a wider variety of customer requirements. The SR240 is a large frame skid steer loader that excels in its torque and breakout force ratings. This makes it ideal for customers who look for a high level of performance in demanding digging and pushing applications. The new vertical lift skid steer loader model, the SV280, delivers the best-in-class dump height of 2,630 mm, making it the best choice for lift-and-carry applications. The new radial lift compact track loader TR310 is also a brand new model with powerful bucket breakout force and operating capacity. It comes with wider, 400 mm tracks that ensure more flotation, stability and traction. These features make it ideal for landscaping, residential construction and agricultural applications.

PRESS RELEASE

Superior Operator Comfort

All the new models feature the spacious cab of the existing line-up, with its excellent all-round visibility, suspension seating and ergonomic controls. In addition, the engine technology ensures lower noise and vibration levels, which enhance the operator's comfort during long working days.

New and upgraded models:

Skid Steer Loaders	SR210	SR240	SV280
ROC [kg] @ 50% Tipping Load	905	1.090	1.270
Boom Geometry	Radial	Radial	Vertical
Operating Weight [kg]	3,160	3,350	3,670
Engine Power [hp]	74	74	74
Engine Torque [Nm]	314	314	314
Emissions Level	Tier 4Final / Stage IIIB	Tier 4Final / Stage IIIB	Tier 4Final / Stage IIIB
Bucket Breakout Force [kN]	32.3	39.4	33.7
Hinge Pin Height [mm]	3,124	3,175	3,302
Dump Height [mm]	2,495	2,560	2,630

Compact Track Loaders	TR270	TR310
ROC [kg] @ 50% Tipping Load	1,225	1,405
Boom Geometry	Radial	Radial
Operating Weight [kg]	3.750	4.027
Engine Power [hp]	74	74
Engine Torque [Nm]	314	314
Emissions Level	Tier 4Final / Stage IIIB	Tier 4Final / Stage IIIB
Bucket Breakout Force [kN]	32.3	38.6
Hinge Pin Height [mm]	3,124	3,124
Dump Height [mm]	2,495	2,495

Case Construction Equipment sells and supports a full line of construction equipment around the world, including the No. 1 loader/backhoes, excavators, motor graders, wheel loaders, vibratory compaction rollers, crawler dozers, skid steers, compact track loaders and rough-terrain forklifts. Through CASE dealers, customers have access to a true professional partner with world-class equipment and aftermarket support, industry-leading warranties and flexible financing. More information is available at www.Casece.com.

Case Construction Equipment is a brand of CNH Industrial N.V., a World leader in Capital Goods listed on the New York Stock Exchange (NYSE: CNHI) and on the Mercato Telematico Azionario of the Borsa Italiana (MI: CNHI). More information about CNH Industrial can be found online at www.cnhindustrial.com.
