Case IH Produces 150,000th Magnum™ Tractor

RACINE, Wis. July 10, 2014

The 150,000th Case IH Magnum tractor was recently produced at the Case IH Racine, Wisconsin, plant. Each Magnum is unique and custom-built, allowing producers to select components to best meet the needs of their operation. Today's Magnum lineup offers 180 to 380 rated horsepower, an improved operator environment and increased fuel efficiency from the only manufacturer with a Selective Catalytic Reduction (SCR)-only solution to meet Tier 4 B emission standards.

- 1988** Case IH launches the Magnum, the first all-new machine to come from the combined engineering of Case and IH.
- 1998** BusinessWeek names the MX Magnum as New Product of the Year — a fitting 10th anniversary present.
- 2009** Case IH expands the line of Continuously Variable Transmission (CVT) technology into the Magnum line (180-225 hp). The Case IH CVT is designed to Automatically balance engine speed and transmission range to provide the best fuel efficiency while maintaining ease of operation.
- 2013** Case IH celebrates 25 years of Magnum tractor leadership and expands CVT technology into the Magnum 235-370 hp models.
- 2014** Case IH continues to lead the engine technology evolution by being the only manufacturer with a CR-only solution to meet Tier 4 B emission standards.
