

New Holland Agriculture Raises Harvesting Stakes With All-New CR Combine Harvester Series

- **Twin Rotor™, Dynamic Feed Roll™, Twin Pitch rotors, IntelliCruise, Opti-Fan™: proven unique technologies deliver more capacity than ever**
- **Massive power, vast grain tank, extensive autonomy: productivity reaches new heights, increasing by up to 15%**
- **Harvest Suite™ Ultra cab: designed for ultimate harvesting comfort**

New Holland's all-new CR Series combines raise harvesting to a whole new level: up to 15% more productivity, grain crackage as low as 0.01%, and the ultimate comfort cab. The brand new Harvest Suite™ Ultra cab is 19% larger and offers 7% more glass than previous models. The five model series is topped by the CR10.90, the most powerful CR model ever and the highest capacity in the industry that delivers an epic performance.

"The new CR series is the culmination of 40 years of Twin Rotor™ technology," stated Dan Valen, New Holland North America Cash Crop Equipment Segment Manager. It offers the best of New Holland's harvesting technologies: Twin Pitch Rotors, Dynamic Feed Roll™, SmartTrax™ rubber tracks, , Tier 4B ECOBlue™ Hi-eSCR engine technologies – all working together to deliver the very best. All this is coupled with the Harvest Suite™ Ultra cab that defines harvesting comfort. You couldn't ask for more."

Proven technologies deliver more capacity than ever

New Holland continues to improve and refine its proven Twin Rotor technology, which is designed for high capacity harvesting and delivers high outputs combined with grain quality without equal.

The Dynamic Feed Roll on-the-go mechanical stone protection system further raises the CR's massive capacity by feeding the rotors faster and more smoothly while removing stones with no stopping or hesitation. The new serrated blades on the roll are gentle on the crop, resulting in high quality grain.

CR Series combines work seamlessly in tough crop conditions with the Twin-Pitch rotors, which can raise productivity by up to 10% in damp conditions. The redesigned adjustable rotor vanes require less power in high volume crops and consistently deliver high capacity. Switching from rice to small grain configurations is easy.

The SmartTrax™ rubber tracks, optional on all models, ensure excellent traction and low soil compaction while providing a silky smooth ride.

Massive power, extensive autonomy, vast grain tank: productivity reaches new heights, increasing by up to 15%

The CR Series combines offer more horsepower than ever: from 401 hp of the CR6.90 to the massive 653hp of the flagship CR10.90. The entire series features the Tier 4B ECOBlue™ Hi-eSCR technology, while the flagship CR10.90 is equipped with the Diesel Of The Year® 2014 Cursor 16 engine which features Common Rail technology for precision fuelling and outstandingly responsive performance, resulting in constant, high productivity in all field conditions.

New Holland's highly efficient ECOBlue technology delivers impressive fuel savings, reducing running costs and extending further the already extensive autonomy given by the capacious fuel tank – 340 gallons in the CR8.90, CR9.90 and CR10.90 models. The extra-long 34 foot folding unloading auger on the larger models is a match for the widest heads.

The grain tank's high capacity – ranging from 315 bushels in the CR6.90 and CR7.90 to 410 bushels in the CR8.90, CR9.90 and CR10.90 – combined with the lightning fast unloading speed of up to 4.0 bushels/second and the extensive autonomy mean that no second is wasted during the day – productivity soars by up to 15 and does not waver until the job is done.

Harvest Suite™ Ultra cab: designed for ultimate harvesting comfort

Designed in consultation with customers, the new Harvest Suite Ultra cab defines harvesting comfort. The ample, 131 ft³ cab is 19% larger than its predecessor, and the interior layout has been entirely redesigned to further improve ergonomics and comfort. The new force based CommandGrip™ multifunction handle is intuitive to use and makes it easy to fine tune harvesting speed to optimise performance. The new harvesting console is designed to become an extension of the operator.

Are we using CommandGrip for the MFL?

The ultra-wide 10.5 inch IntelliView™ IV colour touchscreen monitor puts all key parameters at the operator's fingertips and is fixed on rollers so that it can be moved to the most comfortable position. An optional second IntelliView™ display is available for operators requiring the maximum amount of information.

The new cab also features 7% more glass than previous models. The 68 ft² of glazed area, together with the floor sloping down into the front windscreen, provide excellent visibility all round and a clear view of the edge of the header.

For the long harvesting days, there is a choice of three types of seat offering increasing levels of comfort – from the standard wide cloth seat to the Auto Comfort™ heated seat, and the deluxe Auto Comfort™ seat with air suspension and active ventilation.

When harvesting continues into the night, the lighting package is precision engineered to ensure perfect visibility of the entire header and the field ahead. Unloading auger lights for precision unloading after dark mean farmers can continue to work just as efficiently as late as they need to for the job to get done.

Model	Class	Rotor Diameter (in)	Maximum harvesting power (/hp[CV])	Grain tank capacity (bushels)	Cleaning area under wind control (in ²)
CR6.90	6	17	401	315	8,370
CR7.90	7	17	449	315	8,370
CR8.90	8	22	517	410	10,075
CR9.90	9	22	571	410	10,075
CR10.90	10	22	653	410	10,075

About New Holland

New Holland Agriculture and New Holland Construction sell and service an innovative line of agricultural and construction equipment, including a full line of tractors, hay and forage equipment, harvesting, crop production, skid steer and compact track loaders, compact wheel loaders and mini excavators. Sales, parts and service are provided by more than 1,000 New Holland dealers throughout North America.

New Holland is a brand of CNH Industrial N.V., a World leader in Capital Goods listed on the New York Stock Exchange (NYSE: CNHI) and on the Mercato Telematico Azionario of the Borsa Italiana (MI: CNHI). More information about CNH Industrial can be found online at www.cnhindustrial.com
