

## **T9 Series 4WD – Tier 4B**

*New T9 Series 4WD tractors give you the comfort you want and more of the power you need. High-capacity axles, advanced transmission control and ultra-efficient power engines are housed in a chassis size to match your business needs. If the extreme level of engine and hydraulic power doesn't turn your head, the sleek design and the largest cab in the industry certainly will.*

### **More power and productivity**

T9 4WD tractor engines utilize award-winning ECOBlue™ High-Efficiency Selective Catalytic Reduction (HI-eSCR) technology for Tier 4B compliance. Using cutting-edge and multi-patented HI-eSCR technology, the Cursor 9L and 13L powerplants breathe clean, fresh air for optimal combustion and deliver a significant performance advantage. With Engine Power Management (EPM), up to 62 additional horsepower are available in demanding mobile hydraulic, PTO and transport applications for optimum productivity. With EPM, the T9.700 with 620 rated engine horsepower develops up to 682 horsepower!

### **Absolute driving pleasure**

New Holland puts operator comfort and convenience at the heart of T9 tractor design. Easy-to-use controls and outstanding all-round visibility are a New Holland hallmark, and an all-new luxury seat featuring weight-compensated damping and integrated ventilation further enhances the operating experience. Transmission shifting is slicker than ever, and when combined with four-point Comfort Ride™ cab suspension, you'll enjoy the smoothest ride around.

### **Maximum versatility**

New Holland T9 tractors come in two chassis sizes. Four standard-frame (36-inch) T9 models are row-crop ready and deliver maximum EPM horsepower from 425 up to 550. To enhance versatility, New Holland has added a new wide-frame T9 model, offering you a wider choice of power with three 44-inch models that deliver maximum EPM horsepower of 605 to 682. These wide-frame tractors are perfect for broad-acre work, and are available with either wheels or SmartTrax™ II track system. Three T9 models— the T9.530, T9.600 and T9.645—are available as scraper tractors equipped expressly for moving tons of earth day after day. Enhanced precision steering completes this versatile package.

### **Lower operating costs**

A sound investment delivers the best returns. Operating costs for T9 tractors with ECOBlue™ HI-eSCR engines maintain the low operating costs you have come to expect of your T9, and maintain the 10% fuel reduction when compared to previous T9000 Tier 3 models.
