VW Tiguan Standard Safety Equipment

2016 \star 🛧 🛧 🛧

## SPECIFICATION

Tested Model	VW Tiguan 2.0 TDI 110 kW, LHD
Body Type	5 door SUV
Year Of Publication	2016
Kerb Weight	1531kg
VIN From Which Rating Applies	- all Tiguans of the specification tested
Class	Small Off-Road

## SAFETY EQUIPMENT

		Driver	Passenger	Rear
FRONTAL CRASH PROTECTION				
	Frontal airbag	•	•	—
	Belt pretensioner	•	•	٠
	Belt loadlimiter	•	•	٠
	Knee airbag	•	×	
SIDE CRASH PROTECTION				
	Side head airbag	•	•	٠
	Side chest airbag	•	•	0
	Side pelvis airbag	×	×	0

## SAFETY EQUIPMENT (NEXT)

	Driver	Passenger	Rear
CHILD PROTECTION			
Isofix	—	×	٠
Integrated CRS	—	×	×
Airbag cut-off switch	—	٠	—

### Comments

The passenger compartment of the Tiguan remained stable in the frontal offset test. Dummy readings indicated good protection of the knees and femurs of both the driver and the passenger. VW showed that a similar level of protection would be provided to occupants of different sizes and to those sat in different positions. In the full-width rigid barrier test, protection of the driver was good for all critical body areas and was good for the rear passenger except for the chest, protection of which was marginal. In both the side impact barrier test and the more severe side pole test, the Tiguan scored maximum points with good protection of all critical body regions. Tests on the front seats and head restraints showed good protection against whiplash in the event of a rear-end collision. A geometric assessment of the rear seats showed that occupants would also be well protected in those positions. The Tiguan has an autonomous emergency braking system as standard and tests showed it to be good at avoiding or mitigating low speed accidents where whiplash injuries are often caused.

Restraint for 6 year old child: *Britax Römer Kidfix XP* Restraint for 10 year old child: *Britax Römer Kidfix XP* Safety Features

### Comments

In the frontal offset and side barrier tests, both dummies were properly restrained throughout the impacts. In the frontal test, protection was good or adequate except for the chest of the 6 year dummy, for which dummy measurements of deceleration indicated marginal protection. In the side barrier test, protection of all critical body areas was good for both the 6 and 10 year children. The front passenger airbag can be disabled to allow a rearward-facing restraint to be used in that seating position. Clear information is provided to the driver regarding the status of the airbag and the system was rewarded. In Euro NCAP's installation tests, all restraints could be properly installed and accommodated by the Tiguan, with the exception of the Group 0+ Universal restraint where there was interference between the seatbelt buckle and the base of the restraint.

### Comments

Version 140616

The Tiguan has an 'active' bonnet. Sensors in the bumper detect when a pedestrian has been struck and actuators lift the bonnet to provide more clearance to the stiff engine components. VW showed that the system detected a range of occupant statures across a broad range of speeds so the system was tested with the bonnet in the raised position. Test results were almost exclusively good or adequate. The bumper showed good results at all test locations and scored maximum points for its protection of pedestrians' legs. However, the pelvis area was not well protected, with poor results at almost all test locations. The autonomous emergency braking system is able to detect vulnerable road users such as pedestrians and performed well in Euro NCAP's tests of this functionality.

### Comments

Tests of the autonomous emergency braking system at highway speeds demonstrated good performance, the impact in most cases being avoided or mitigated. The Tiguan has a standard-fit seatbelt reminder system for the front and rear seats and also a lane assistance system that helps to correct the deviation when the car is drifting out of lane. A speed assistance system is also available but, as it is an option, it was not included in this assessment.
