

# AMTRAK CITIES SPRINTER: Built across America by Siemens

Siemens and 69 local manufacturers in 23 states are part of a national community building state-of-the-art ACS-64 locomotives.

■ States with Factories Contributing to ACS-64

The next era of high-performance, energy-efficient locomotives will enable Amtrak to provide improved performance, reliability and mobility for regional and intercity routes along the country's heavily-traveled Northeast and Keystone Corridors.

A true "Made in America" manufacturing and technology transfer story, Siemens—a global leader in rail innovation—is producing the locomotives at its solar-powered rail manufacturing plant in Sacramento, California, with major components sourced from suppliers in 61 cities from 23 states.

**70 new locomotives**  
new locomotives are replacing ones that have been in service more than 25 years

Building the ACS-64 provided work for:

**69** suppliers  
**23** states  
**61** cities

The 70 new locomotives could save over

**3 billion**  
kilowatt hours of energy.

Increased energy efficiency could result in more than  
**\$300 million**  
in savings over 20 years.

Regenerative braking can feed up to

**100%**

of the energy generated during braking back to the power grid
