

## **TAGG CELEBRATES CNY BY GIVING AWAY ANG BAO NODES WORTH UP TO US\$1,000**

17 February 2016

TAGG, a pioneering earn-as-you-play sci-fi strategy game, headquartered in Singapore, is giving away a limited number of Ang Bao Nodes to usher in the Year of the Monkey and celebrate the launch of the TAGG Beta Portal at [www.playtagg.com](http://www.playtagg.com).

Open to all, simply register at the TAGG portal, spin the wheel, and participants will receive an Ang Bao Node worth USD10, USD100 or USD1000. For every three friends participants invite to TAGG, they will receive an additional spin of the wheel and further Ang Bao Nodes.

Participants can choose to hold on to their Nodes and play TAGG strategically, generating greater yield, or request for the value of their Nodes to be made out to them at any time.

Paul Teng, Gamemaster and Chief Executive Officer of TAGG, commented: *"Chinese New Year has always centred around appreciating family and friends, and sharing the blessings of health, prosperity and good luck. So this year, I thought there was no better way to celebrate than to give away Ang Bao Nodes and enable as many people to be part of the movement to democratise yield and share in our success."*

Developed by SIX CAPITAL, TAGG is the first iteration of an earn-as-you-play sci-fi strategy game. It is powered by SIX CAPITAL's award-winning Ricebowl® business model, that seeks to democratise yield generation for a wider audience.

### **Notes to Editors:**

#### **About TAGG**

TAGG is an earn-as-you-play strategy-based game designed to substitute the conventional conduit through which people can access the opportunities in the currency market, serving to democratise yield.

TAGG's game economy engine is powered by Six Capital's award-winning Ricebowl® business model where the aggregation of trader instinct and market dynamics meet advanced big data analytics.

## **About SIX CAPITAL**

SIX CAPITAL is a pioneering company focused on leveraging the potential of the currency markets. SIX CAPITAL's vision is 'to create the future of jobs', producing lasting, positive impact on economies and society through its co-creation partners.

SIX CAPITAL's business ecosystem seamlessly combines trader insights and market dynamics through advanced big data analytics. Ricebowl®, Six Capital's advanced proprietary platform, is used to develop elite traders on dummy accounts, in order to remove the emotional aspects of trading, whilst collecting unrivalled depth and scale of data input. Ricebowl® uses Big Data Analytics and Artificial Neural Network (ANN) technology to generate enriched trade data with optimised entry and exit parameters, which are copied into live trades in the currency markets.

From just 100 seats in 2013, SIX CAPITAL today has a total of 1,000 seats in dealing rooms across Singapore, India, China, and Indonesia. Strategic partnerships with China Centre for Financial Training (CCFT), the training arm of the People's Bank of China, the Indonesian Chambers of Commerce (KADIN), Singapore Institute of Management (SIM), and the Chartered Bankers Institute, UK, all demonstrate SIX CAPITAL's commitment to delivering positive change around the world. In 2014, SIX CAPITAL was awarded the Avant-Garde Special Award at SME One Asia.
