

## Press Release

### **Lamborghini Huracán Performante and Aventador S Debut in Asia at Auto Shanghai 2017**

- **Forged carbon fiber technology and active aerodynamics “Aerodinamica Lamborghini Attiva” (ALA) providing ultimate road and track performance of the Huracán Performante**
- **The Lamborghini Aventador S, the next generation of the V12 flagship elevates the benchmark for super sports cars**
- **Greater China is a key market for Lamborghini**

*Sant’Agata Bolognese/Shanghai, 19 April 2017* – Automobili Lamborghini presents at Auto Shanghai 2017 four models. The Lamborghini Huracán Performante and the Aventador S make their premieres in Asia.

The Huracán Performante combines new lightweight technologies, active aerodynamics with aero vectoring and a new set-up of chassis, all-wheel-drive system and further improved V10 powertrain. This car is the result of Lamborghini innovations, producing a super sports car balanced between achieving the best lap times on a circuit with the most engaging and dynamic road driving. The Huracán Performante set a new production car lap record of 6:52.01 min on the Nürburgring Nordschleife in Germany

The Huracán Performante adopts Aerodinamica Lamborghini Attiva (ALA): ALA, which is the Italian word for “wing”. This patented active aerodynamic system is developed by Lamborghini for the Huracán Performante. The system provides an active variation of aero load for high down force or low drag, which significantly improves the road and track performance.

“The Huracán Performante is a product of our advanced technological developments in order to design a car that delivers perfect performance,” says Automobili Lamborghini Chairman and Chief Executive Officer Stefano Domenicali. “With its innovative technology, the Huracán Performante enhances the Huracán family and brings it to a new level.”

The Aventador S, the latest model in the Aventador family, defines a new benchmark for super sports cars. The Lamborghini Aventador S has the Aventador family's iconic design focused on achieving excellent aerodynamic performance. The new generation V12 naturally aspirated engine in the Aventador S outputs 740 hp, and it accelerates from 0 to 100 km/h in just 2.9 seconds and can reach a top speed of 350 km/h.

The new Aventador S is calibrated with four-wheel drive as well as a novel four-wheel steering system – a first for a series production Lamborghini – to

## Press Release

further enhance lateral control, agility and stability. The new EGO driving mode does not only improve the performance of the Aventador S, but also creates a remarkable driving experience.

"The Aventador S represents an evolution of more performance and more state of the art technology. We are debuting the Aventador S in Asia at the Shanghai Auto Show to showcasing Lamborghini's long term commitment to China market." says Lamborghini's Managing Director of Greater China, Francesco Scardaoni. " China is one of the key markets for Lamborghini. Lamborghini is committed to providing the best products, highest level of services and a perfect brand experience to Chinese customers."

The Huracán RWD Coupé and Huracán RWD Spyder also make their appearance at the Shanghai Auto Show. The Huracán RWD Coupé is equipped with a naturally aspirated V10 engine to give an impressive driving experience, while the Huracán RWD Spyder combines the lifestyle appeal of the convertible with the pure driving experience of the Huracán's rear-wheel drive technology.
