

## **IGNITE Limitless NETFIT**

One shoe, infinite lacing styles. Be seen on the street.

The IGNITE Limitless NETFIT upper features PUMA's brand new NETFIT technology, giving users an entirely customizable lacing system that can be tailored for a completely individual fit. For increased visibility, the Limitless comes with added sets of colored laces and a reflective heel clip logo ensuring that you're seen when you're hitting the streets, even into the night.

The midsole boasts a high shine full length TPU jewel piece running along the top line of the outsole for a supportive ride. The core of the midsole is constructed by IMEVA and an IGNITE foam drop-in for lightweight performance and superior energy return. The outsole is built with rubber outsole pods, providing full ground contact whilst remaining lightweight. IGNITE foam rounds off this impressive package by offering full energy return and cushioning.

The IGNITE Limitless NETFIT is for someone who wants to run the streets, but be seen when they're doing it. Be faster, be seen.
