

Commercial Office Solutions

Integrated Private Office Lighting & Controls System that's Compatible and Easy to Install

Private Office Solutions is the first in our series of Commercial Office Solutions Sets. It features our FS series of recessed LED Luminaires with eldoLED® driver technology, combined with our award-winning nLight® controls from Acuity Controls.

This "one stop shop" for a back-to-front lighting system includes integrated controls to meet any level of sophistication the job dictates. And because the lighting and controls come from one source, your Acuity Brands system will be accurate, complete, and aligned with your job's specific needs – turning complexity into simplicity by providing interoperability of all the key elements.

Key Features

- Single manufacturing source for all elements means interoperability and integration ease
- Solution sets allow you to spend more time on higher-profile areas
- Acuity Brands offers dependable operability of your lighting and controls

AcuityBrands®

Expanding the boundaries of lighting™

Commercial Office Solutions from Acuity Brands are conveniently designed so you can quickly and conveniently select the right lighting system for your space and give you the compatible technologies to get the job done easily.

Our solutions approach allows you to select the control technology, desired light levels, qualified energy savings and personal visual comfort level that is right for the space while helping you meet code and your budget.

Commercial Office Solutions FS Series Recessed LED Luminaire

- Now nLight enabled!
- Integrated with ceiling-mounted occupancy sensor
- Push-Button WallPod

Why Acuity?

We're the leader in smart lighting solutions, offering the top technologies in the industry. And our passion is bringing these together for our customers. Our solutions approach makes it easy for you to specify and install quickly and confidently so you move on to the next project.

You'll have the confidence of our certification, too

Acuity Brands announces the industry's first comprehensive certification that covers a broad offering of entire LED systems. From the visual aspects of LED lighting to nLight digital controls, you can select, install and enjoy efficient lighting – quickly and confidently.

- Compatible Electronically: enabled by eldoLED drivers and nLight controls, our certified LED systems will work together to start, dim and turn off consistently, and have been extensively tested as complete systems.
- Consistent Visually: initial lumen output and color consistency factory-calibrated and verified.
