

- Embrace outdoor running in pieces designed to supercharge your run -

As temperatures fall, embrace outdoor running with layered looks from the **Fall/Winter 2016 adidas by Stella McCartney Run** range.

Tackle running in the colder months head on in Stella's signature winter run look. Layer the **Run Climaheat Short** over the **Run Climaheat Tight** and add the **Climaheat Fleece** for extra warmth. Thanks to a hollow fibre construction, targeted Climaheat technology keeps runners warm by creating additional insulation when it matters the most. As the cold descends, find extra protection in the **Padded Knit Jacket**, engineered with breathable, water-repellent Climastorm technology to ensure dryness and maximum comfort.

Discover ultimate endurance and stability in the **Ultra BOOST™** shoe. Featuring a full-length BOOST midsole, thousands of energy infused BOOST foam capsules release energy with every stride, helping runners go further than ever before. Perfect for the colder season, the shoe's Continental™ Rubber outsole provides solid grip in all conditions, wet or dry.

Alternatively, the **pureBOOST X** running shoe, specifically designed for the female athlete, provides supreme support and a sock-like fit. Its dynamic adaptive fit system delivers maximum breathability and flexibility, making it the perfect shoe for daily runs.
