Climacool 02/17 (+W)

adidas Originals' contemporary iteration of the iconic ClimaCool silhouette receives two new color treatments this month in a release for both men and women.

Retaining the materialway that gives the series its name, the latest release of the ClimaCool 02/17 features a full ClimaCool mesh construction across the upper, complemented by a breathable sock-fit liner and a minimalist lacing system. Welded 3-stripes marks and a classic ClimaCool branding on the tongue nod to the original ClimaCool aesthetic, whilst a lightweight AdiPrene midsole and structural molded TPU details on the heel and toe bumper complete the shoe's referential design. For women, the ClimaCool 02/17 is rendered in a tonal Tactile Green colorway atop a crisp white tooling, whilst the men's iteration steps out in a pure, tonal white edition. Each shoe culminates as an understated progression of the ClimaCool philosophy, 15 years on from its original release.
