

Information

NMD_R2 / NMD_CS2

The NMD_R2 and NMD_CS2 silhouettes step out in a striking new graphic treatment this season in a women's-exclusive release courtesy of adidas Originals.

First up, a new edition of the NMD_R2 model features a full Primeknit construction with an engineered geometric shadow knit pattern, structured by the shoe's signature leather heel patch and minimalist lacing system, placed atop a Boost midsole with the NMD_R2's asymmetrical EVA plugs on the medial side and engraved stripe detail on the lateral side. The shoe is then rendered in a raw pink colorway with contrast grey details for a unique seasonal take on the NMD aesthetic.

Secondly, a complementary NMD_CS2 model assumes the same construction in a different form, accenting a full Primeknit upper with an all-over geometric shadow knit pattern and contrast ankle details. Finishing touches include a heel-pull with adidas branding and essential NMD Boost tooling with asymmetrical EVA midsole plugs. Releasing in a Trace Green colorway with Trace Pink ankle details, the NMD_CS2 combines with the NMD_R2 to create a striking two-pronged release for the second generation NMD models.
