EQT Support ADV / Snakeskin

The EQT Support ADV, a modern interpretation of the original EQT philosophy, steps out in 3 striking new treatments this month, switching out the shoe's typically utilitarian materials for a fashion-forward approach.

Featuring a regular knitted mesh construction across the vamp, the EQT Support ADV silhouette is upgraded through snakeskin leather quarter panels around the heel and quarter, overlaid with vital structural elements such as integrated webbing tape 3-stripe mark and soft-molded TPU support piece. Placed atop the shoe's usual EVA midsole with distinctive 3-stripes details, the shoe is then finished with subtle details such as nubuck overlays, tonal laces and an EQT woven label on the tongue. Releasing in tonal White, Red and Black colorways with contrast white midsoles, it's a release that sees the EQT Support ADV shoe in its most style-considered form yet.
