

Better Roads Magazine Names CASE 821F, 921F Tier 4 Final Wheel Loaders “Top Rollouts”

Racine, Wis., December 19, 2014

[Better Roads magazine](#) named CASE Construction Equipment’s [821F](#) and [921F Tier 4 Final wheel loaders](#) to their 2014 “Top Rollouts” list. Compiled by magazine staff, the list features the top 25 products introduced over the past year.

The 821F and 921F wheel loaders meet Tier 4 Final emissions standards. Each machine is equipped with a selective catalytic reduction (SCR) solution that treats emissions separately with Diesel Exhaust Fluid (DEF) and does not require the engine to re-circulate exhaust gas, resulting in a 10 percent increase in fuel economy. The wheel loaders use powerful hydraulics in addition to features such as four programmable power modes, optional heavy-duty axles and a five-speed transmission.
