

CASE M Series Dozers, 1221F Wheel Loader Named “Top RollOuts” by *Aggregates Manager*

Racine, Wis., December 19, 2014

CASE Construction Equipment’s [M Series crawler dozers](#) and [1221F wheel loader](#) have been named two of the 2014 “Top RollOuts” by [Aggregates Manager magazine](#). The list is compiled by the magazine staff, which reviews product introductions from the past year and picks the top 25 to feature.

The M Series features five models that range from 92 to 214 net horsepower with operating weights from 21,500 to 48,800 pounds. The engines have SCR-only emissions-reduction technology and save up to 14 percent in fuel, while increasing efficiency by 19 percent. The dozers have best-in-class horsepower and drawbar pull (dependent on model), reduced noise, industry leading visibility, new versatile controls, and more.

The 1221F, the largest model in the F-Series wheel loader line, features an 11.9-liter Tier 4 Interim-certified engine that delivers up to 370 horsepower. The loader is built for heavy earthmoving and loading applications such as those encountered in aggregate and mining operations. Enhancements to the engine and transmission at maximum travel speed allow for increases in productivity of at least 18 percent and fuel efficiency of at least 8 percent.
