FPT INDUSTRIAL CHINA PRESENTED THE RELIABLE PRODUCT OF CHINA URBAN TRANSPORTATION INDUSTRY AWARD

A leader in powertrain technology, FPT Industrial has been presented with the award 'Reliable Product of China Urban Transportation Industry' for its EEV standard LNG engine.

Awarded for the engine's high efficiency and low emissions, it was presented at the recent 2013 China Urban Transportation Summit, held in Shenzhen City, China. Organised by the China Association for Science and Technology and the China Road Transport Association (CRTA) Urban Passenger Transportation Division, almost 200 automotive suppliers were in attendance.

"It's an honour to receive this recognition for FPT Industrial's contribution to the Chinese market," said by Mr. Yu Ning, FPT Industrial China Country Manager. "Looking to the future, the company plans to introduce further developed LNG/CNG and Euro 6 engines with environmentally-enhanced technology."

FPT Industrial is a global company focused on developing and manufacturing a range of engines for applications that include public transport. FPT Industrial aims to continue its service to local customers with a focus on developing power and its environmental offering.

FPT Industrial

FPT Industrial is a company of FIAT Industrial dedicated to the design, production and sale of powertrains for on and off-road vehicles, marine and power generation applications.

The company employs approximately 8,000 people worldwide, in ten plants and six R&D Centres. The FPT Industrial sales network consists of 100 dealers and over 1,300 service centres in almost 100 countries.

A wide product offering, including five engine ranges from 31 kW up to 740 kW and transmissions with maximum torque from 300 Nm up to 500 Nm, and a close focus on R&D activities make FPT Industrial a world leader in industrial powertrains.
