

EUROCARGO EURO VI. PERFECT FOR EVERY SITUATION

London, 28 November 2013

SUCCESS STORY: A LEADER FROM THE START

Iveco presents the new **Eurocargo Euro VI**: a medium range vehicle with numerous achievements, reinforced by **reliability and flexibility, making it a multi-purpose vehicle that can be adapted for every mission type.**

Europe's favourite "medium range", a veritable icon in its segment for its versatility, sets another record today by combining the cutting-edge innovation with superior power and optimized fuel efficiency through the **exclusive HI-eSCR technology**, patented by FPT Industrial. This innovative after treatment system **reduces nitrogen oxide (NOx) emissions by over 95%** without altering the combustion process, without the requirement of an auxiliary cooling system and without affecting the vehicle's architecture and costs.

The new Tector 5 and 7 Euro VI engines are the only ones in this segment to offer **HI-eSCR** technology thereby positioning themselves at the top of their category, supplying elevated and consistent performance.

The new range includes three new Tector 5 models – with 160, 190 and 210 HP – and four Tector 7 models, with 220, 250, 280 and 320 HP. The displacement of the **Tector 5 and Tector 7, four and six cylinders respectively**, has been increased to obtain optimal versatility for various applications.

The engine power of the **Tector 5**, with a displacement of 4.5 litres, has been increased by 13%, permitting the vehicle to reach 210 HP. The performance of the **Tector 7** engine, with a 6.7 litre, has also been improved with an increase in power of up to 320 HP thanks to a 7% increase in power.

The Eurocargo range is also enhanced with a **new Eurotronic automated ZF transmission with 12 gears**, available for the 6-cylinder Tector 7 as well as for towing versions.

PRESS RELEASE

Iveco

Iveco, a CNH Industrial company, designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks, city and intercity buses and coaches as well as special vehicles for applications such as fire-fighting, off-road missions, defence and civil protection.

Iveco employs over 26,000 individuals globally. It manages production sites in 11 countries throughout Europe, Asia, Africa, Oceania and Latin America where it produces vehicles featuring the latest advanced technologies. 5,000 sales and service outlets in over 160 countries guarantee technical support wherever an Iveco vehicle is at work.
