

Draper Headers

4 Models, 25-40 ft (7.6-12.2 m) Cutting Widths: Case IH DH3 series draper headers make quick work of big acreage, with double-knife and double-swath options. The heads are compatible with all Case IH WD3 Series II and WD4 windrowers.

More Acres, Less Time

- Dual Circuit Header Drive provides more power to the knife drive and draper belts for faster cutting and better swath formation
- All-new 40-foot draper header covers more acres in less time
- Low-profile cutterbar cuts closer and cleaner to reduce harvest loss

Maximum Control with the Hydraulic Flotation System

Allows the header to closely follow ground contours so you capture all the crop you grow. The return-to-cut feature uses cut height cylinders on each lift arm to easily return to the preset cutting height on each pass. Make this adjustment easily from the seat of the cab using the cut height control switches on the MultiFunction Propulsion Lever.

Transport Options

Transport - 25 & 30 Ft. Headers

- Heads are available without transport system
- 2-wheel, removable/swing away transport system similar to DH2 Series

Transport - 35 & 40 Ft. Headers

- Integral 4-wheel dolly transport system

DH2 Cutterbar: Enhanced Cutting Performance

- Low-profile design, ideal for harvesting short crops
- The large-diameter reel provides superior delivery of crops from the cutterbar to draper belts
- Choose from five- or six-bat pickup reels with steel or plastic fingers; Pickup reels lift crop to the cutterbar in downed crop conditions
- Durable cutterbar skid shoes (Recommended when running header close to the ground for a low cut height)
- The hay guard fits behind the cutterbar to direct crop on top of draper belts
