

FPT INDUSTRIAL RELAUNCHES THE PARTNERSHIP WITH MERCURY MARINE AT MIAMI INTERNATIONAL BOAT SHOW 2017

Turin, February 17, 2017

A new step forward in the partnership between **FPT Industrial** and **Mercury Marine** was introduced at the Miami International Boat Show 2017. At the exhibition the new 6.7 liter **electronic fuel injection common-rail** NEF engine branded Mercury Diesel was presented and will be offered with three power levels: **480hp, 500hp and 550hp**.

Boasting an overall production of more than 1.6 million engines since 2001 from the NEF series, the new 6.7 liter FPT Industrial marine engine customized for Mercury Marine, leads pleasure boating technology and performance. Many seasons of proven presence in the market, victories and speed records in "endurance" challenges, have been the best "proving grounds" for the development of this engine.

“This second step in the strategic partnership with Mercury Marine, initiated in 2015, emphasizes the FPT Industrial technological leadership by providing enlarged offer to customers with best in class product and service, bolstering FPT Industrial competitiveness in the Marine engines business,” said **Massimo Rubatto**, Vice President Sales at FPT Industrial.

“Mercury has established itself as providing the best integrated propulsion solutions to our customers,” said **David Foulkes**, Brunswick Corporation’s Vice President & Chief Technology Officer and Mercury Marine vice president – Product Development, Engineering and Racing. “This is the first opportunity to provide our fully integrated ecosystem of technology and ease of boating features to our mid-range diesel customer.”

Mercury Diesel 6.7 liter Specifications

Displacement:	6.7 ltr.
Main Features:	6 cyl.in line - 24 valves – Electr. Common Rail - WG TCA
Power (hp/rpm):	550 / 3200
Max Torque (Nm/rpm):	1580 / 1800
Fuel Cons. @ rated power (g/kwh):	229
Dry weight (kg):	705
L* / W / H (mm):	1090 / 885 /837 (* @ flywheel)
Emissions compliance:	IMO Marpol Tier 2 – EPA Tier 3 – RCD Stage II

FPT Industrial is a brand of CNH Industrial, dedicated to the design, production and sale of powertrains for on and off-road vehicles, marine and power generation applications. The company employs more than 8,000 people worldwide, in ten manufacturing plants and seven R&D Centres. The FPT Industrial sales network consists of 93 dealers and over 900 service centres in almost 100 countries. A wide product offering, including six engine ranges from 31 kW up to 740 kW, transmissions with maximum torque of 200 Nm up to 500 Nm, front and rear axles from 2 to 32 ton GAW (Gross Axle Weight) and a close focus on R&D activities make FPT Industrial a world leader in industrial powertrains.
