

CASE Launches Combination Vibratory Roller

New DV45CC Combination Vibratory Roller (front drum with rear pneumatic tires) delivers smooth surface finish for small- to mid-size applications

Racine, Wis., March 7, 2017

CASE Construction Equipment introduces the new DV45CC combination vibratory roller. The new vibratory roller compacts with the front drum and delivers a smooth finish with the rear pneumatic tires. An offset drum with tapered edge and high curb clearance offers precision compaction capabilities in tight spaces; and adjustable scrapers, an automatic vibration control system and a pressurized water system ensure a smooth, clean finish in a variety of asphalt applications.

With an operating weight of 10,296 pounds and drum width of 54 inches, the DV45CC is ideal for walkways, residential driveways, bike paths, tennis courts and small parking lots.

DV Series Vibratory Rollers

The DV Series combines a compact size, and excellent maneuverability and visibility, with the same control features found in heavy asphalt rollers. The DV45CC rollers feature a tapered offset drum in combination with rear pneumatic tires and high curb clearance, delivering a smooth asphalt finish right up to high curbs or other tight areas. DV Series compactors are designed to provide a tighter turn radius, which improves compaction times, and the offset tapered drum reduces asphalt tearing while compacting around curves.

A 40.8 HP Tier 4 Interim engine delivers high centrifugal forces and frequencies at lower RPMs, making the machine more fuel efficient, while standard dual amplitudes (0.01/0.21 inches) and dual frequencies (2,700/3,420 VPM) further improve productivity. The automatic vibration control system provides automatic or operator-controlled start and stop to the drum.

Comfort & Visibility

The DV45CC features an iso-mounted operator platform that minimizes vibration and reduces operator fatigue. A standard lateral-sliding seat provides operators with superior visibility to the drum edge on both sides of the machine.

Serviceability

Like all CASE machines, the DV45CC is designed for groundline serviceability. All fluid ports, drains and service checkpoints are grouped on one side of the machine for simplified maintenance.

PRESS RELEASE

CASE Construction Equipment sells and supports a full line of construction equipment around the world, including the No. 1 backhoe loaders, excavators, motor graders, wheel loaders, vibratory compaction rollers, crawler dozers, skid steers, compact track loaders and rough-terrain forklifts. Through CASE dealers, customers have access to a true professional partner with world-class equipment and aftermarket support, industry-leading warranties and flexible financing. More information is available at www.CaseCE.com.

CASE Construction Equipment is a brand of CNH Industrial N.V., a World leader in Capital Goods listed on the New York Stock Exchange (NYSE: CNHI) and on the Mercato Telematico Azionario of the Borsa Italiana (MI: CNHI). More information about CNH Industrial can be found online at www.cnhind.com.
