New Holland unveils T5 Utility tractors at Grassland and Muck

- *New Holland showcases T5 Utility tractor range at Grassland and Muck 2017*
- T5 range extended to eight models including five brand new Tier 4A Utility models to compliment Tier 4B Electro Command models
- New RollBaler 125 for fixed round chamber baling for silage or straw on display
- Flagship BigBaler 1290 Plus square baler on display

Farmers will get their first look at New Holland's recently launched T5 Utility tractor range alongside its latest round and square baler models at Grassland and Muck on 24 – 25 May 2017.

New Holland has added a further five models to its T5 range of tractors to complete the mid-range tractor line up. The latest Utility models offer between 75 and 114 hp and continue the heritage of New Holland's well-regarded T5000 series - 24x24 Dual Command transmission, capable performance and compact size, and all at a competitive price.

The larger, three model T5 Tier 4B Electro Command range launched in 2016, offers between 99 and 117hp with a semi powershift ElectroCommand™ transmission, upgraded styling and optional cab and axle suspension.

New T5 Utility tractors can be specified with a choice of two- or four-wheel drive on all Synchro-Shuttle models (four-wheel drive on all others), plus a wide choice of transmissions including Dual Command, Power Shuttle, and Creep-speed to suit individual requirements.

Loader-ready, the T5 can support a maximum lift capacity of up to 2,539kg with a maximum lifting height of 3.7m from New Holland's 740TL front loader. For added versatility a front linkage is also available, offering a lift capacity of 1,670 kg combined with a 1000-speed PTO.

Rear lift capacity is impressive, with a maximum of 4,400kg with a second assist ram. A three-speed PTO featuring ECO and ground speed increases the number of implements that can be used and reduces fuel consumption.

And New Holland hasn't forgotten the operator either. In the spacious VisionView™ cab, drivers benefit from an ergonomic control layout, a choice of seats and air conditioning, along with a full width high visibility roof panel for improved safety, particularly when operating a front loader. The Heavy Duty (class 1.5) front axle, available on the T5.95, 105 and 115, gives greater load carrying capacity, also enhancing these tractors for loader work.

PRESS RELEASE

Alongside the first showing of the New Holland T5 Utility tractor, the extensively renewed and upgraded RollBaler 125 and BigBaler 1290 Plus models will be on display at Grassland and Muck.

The RollBaler 125 offers the best choice in fixed round chamber baling for silage or straw - even when working with heavy grass, dense hay or large, dry, brittle straw swaths.

Boasting a new, wider pick-up measuring 2.3m, giving an additional 10 cm on the previous model, the RollBaler 125 delivers best-in-class efficiency. A new, advanced roller reduces crop losses even in dry conditions, ensuring consistent and superior bale density.

The new flagship BigBaler 1290 Plus is New Holland's largest, square baler yet and has a host of unique features. From IntelliCruise™ technology for tractor ground speed regulation to its SmartFill™ feed flow indicators for even bale formation, it is worthy of its best-in-class titles.

Nothing is left behind when using the BigBaler 1290 Plus. The new biomass kit makes short work of stiff and stalky biomass material and the MaxiSweep™ pick-up design improves productivity over high tonnage windrows. The BigBaler 1290 Plus raises the bar on durability and reliability, with improved wear resistance and easier maintenance for reduced stoppages.

New Holland will be at Grassland and Muck from 24-25th May.

New Holland Agriculture's reputation is built on the success of our customers, cash crop producers, livestock farmers, contractors, vineyards, or groundscape professionals. They can count on the widest offering of innovative products and services: a full line of equipment, from tractors to harvesting, material handling equipment, complemented by tailored financial services from a specialist in agriculture. A highly professional global dealer network and New Holland's commitment to excellence guarantees the ultimate customer experience for every customer.
