

PRESS RELEASE

## New Holland Agriculture Bolsters ProCart Wheel Rake Offering with ProCart Plus

**New Holland, Pa. (August 29, 2017)** – The proven leader of haytools, New Holland Agriculture is pleased to expand its ProCart wheel rake offering to include the new premium ProCart Plus models. Designed for fast, clean and high-capacity raking, the New Holland ProCart Plus deluxe carted wheel, rakes swiftly and handles a multitude of raking conditions.

“The first step to building a good bale is building a good windrow,” said Daniel Valen, Director of Product Marketing for New Holland North America. “The ProCart Plus provides new features and benefits which allow the operator to adjust the rake on the go from the tractor seat. That means the operator can maximize crop in the windrow, minimize foreign debris, and ensure the crop is fully turned for the fastest and most efficient dry down possible. That’s the ProCart Plus advantage.”

Now available in 5 different models including ProCart 819, ProCart 1022, ProCart 1225, ProCart 1225 Plus and ProCart 1428 Plus, New Holland’s ProCart series rakes offer heavy-duty features, including extended raking widths, as well as the ability for operators to rake any way they choose, from single-side and “V” raking, to windrow turning capabilities. While sitting in the tractor seat, operators can easily adjust the raking angle and width to build the perfect windrow for the operator’s baler or harvester, or easily fine-tune adjustments.

The ProCart follows ground contours independently with an independent rake wheel flotation which gathers every bit of swath, causing less stubble damage, compared to rakes with tandem-mounted rake wheels. Suspended by an adjustable compression spring, the rake wheel can be adjusted to each operator’s crop and field conditions for the cleanest possible raking.

For more information on the all-new ProCart 1225 and 1428 Plus models and to learn more about the widest hay and forage product portfolio in the industry, visit [www.newholland.com](http://www.newholland.com) or contact your local New Holland dealer.

**Fueling Innovation** exemplifies the entrepreneurial spirit of finding alternative fuel sources, but it also follows our legacy of over 120 years of creating innovative and practical products for agriculture. From our Precision Land Management strategies, such as the NH<sup>DRIVE</sup> autonomous vehicle concept and our dedication to being the Clean Energy Leader, New Holland is committed to finding new and better ways to make innovative equipment accessible and more productive.

### About New Holland

New Holland Agriculture and New Holland Construction sell and service an innovative line of agricultural and construction equipment, including a full line of tractors, hay and forage equipment, harvesting, crop production, skid steer and compact track loaders, compact wheel loaders, tractor loader backhoes and mini excavators. Sales, parts and service are provided by more than 1,000 New Holland dealers throughout North America.
