

## CASE Receives Four Top 100 Awards from Construction Equipment Magazine

Racine, Wis., December 4, 2017

[CASE Construction Equipment](#) had four new products/product groups—the CASE G Series wheel loaders, the CX750D crawler excavator, the DV23CC and DV26CC combi rollers, and the SV340 skid steer loader—named to *Construction Equipment's* 2017 Top 100 New Products list.

Compiled based on editors' reviews and nominations, the Top 100 awards are designed to recognize the top equipment of the year based on advances in technology, new product lines, significant improvements to existing products and increasing competition in the field.

More about the winning products:

### **G Series Wheel Loaders**

The introduction of the G Series brings the entire CASE wheel loader line to Tier 4 Final compliance featuring Selective Catalytic Reduction (SCR) engine technology that increases fuel efficiency, keeps exhaust temperatures down and eliminates regeneration or lifetime diesel particulate filter (DPF) costs/maintenance.

An all-new operator environment, controls and interface make the G Series the most intuitive and easy-to-operate wheel loaders CASE has ever produced. Efficiencies in power/output, maintenance and operator ergonomics/interaction – combined with CASE ProCare – provide an exceptionally low and predictable total cost of ownership/productivity across the entire product line.

### **CX750D Crawler Excavator**

The CX750D is the largest and most powerful machine in the CASE excavator line to date. Operating at a best-in-class 512 horsepower, the CX750D is available in standard and "mass excavation" configurations. The mass excavation configuration features a shorter boom and arm that allow for greater breakout forces and faster cycle times, and is capable of handling larger buckets for added capacity.

PRESS RELEASE

The CX750D has been built to achieve faster cycle times, improved control/responsiveness and greater fuel efficiency. An electronically controlled hydraulic pump and larger control and solenoid valves boost breakout forces, increase lifting strength and improve responsiveness. These features combine with the CASE Intelligent Hydraulic System and its four integrated control systems to make the best use of the machine's hydraulic power and momentum, resulting in added strength and fuel efficiency. Like all D Series excavators, the CX750D comes standard with CASE ProCare.

#### **DV23CC and DV26CC Combi Rollers**

The new DV23CC and DV26CC vibratory rollers compact with the front drum and deliver a smooth finish with rear pneumatic tires. An inline drum with tapered edge and high curb clearance offers precision compaction capabilities in tight spaces, and adjustable scrapers, an automatic vibration control system and a pressurized water system ensure a smooth, clean finish in a variety of asphalt applications.

With operating weights of 4,740 pounds and 4,916 pounds, and drum width of 39.4 inches and 47.2 inches respectively, the DV23CC and DV26CC are ideal for walkways, residential driveways, bike paths, tennis courts, small parking lots and other small- to mid-size applications.

#### **SV340 Skid Steer Loader**

With a rated operating capacity of 3,400-pounds and bucket breakout force of 9,531-pounds, the 90-horsepower SV340 is CASE's most powerful skid steer ever built. The SV340 offers optional high-flow (38.7 gpm at 3,450 psi) and enhanced high-flow (35 gpm at 4,000 psi) auxiliary hydraulics for operating a broad range of high capacity attachments such as cold planers and mulching heads. Heavy-duty 14 x 17.5 tires, additional counterweights and a long wheelbase provide a stable platform for work in all terrains.

For more information on the G Series wheel loaders, CX750D crawler excavator, DV23CC and DV26CC combi rollers, and the SV340 skid steer loader, visit [CaseCE.com](http://CaseCE.com).
