Issue date: 03/10/14

*Caption: Greater fuel savings with higher horsepower, combined with a redesigned operator environment make the new Farmall C a reliable and cost-effective tractor.*

## Get more done every day, with the newest Farmall tractor

### Case IH Farmall C offers performance, productivity and comfort

The Farmall® C, Case IH's newest mid-size tractor, reliably and cost-effectively delivers the power and performance Australian farmers expect, with a superior interior environment.

The well known Farmall name represents a powerhouse that meets the demand for rugged equipment that gets those day-to-day jobs done – from the feedlot to the pasture – while being comfortable and easy-to-operate.

“It’s a multipurpose model ready to meet any challenge – whether you are mixing feed or baling hay,” says Peter Elias, Case IH Product Manager – Tractors, who adds that the new Farmall C range provides three options to choose from:

- Farmall 95C with 82 PTO HP
- Farmall 105C with 91 PTO HP
- Farmall 115C with 96 PTO HP

### Clean diesel power

Tough at heart with updated clean-diesel technology, the new Farmall C models use Case IH FPT Industrial 4-cylinder 3.4-L turbocharged and intercooled engines. Precise electronic fuel metering and electronic high-pressure fuel injection improves efficiency, extends engine life and improves cold-engine starting. Most importantly, it provides efficient power.

“This unique fuel injection system provides greater fuel savings, even with higher horsepower levels,” says Peter.

### Comfortable and productive

The newly designed Farmall cab goes a step above the rest to make the operator's day better and more productive, with user-friendly features such as a power clutch for easy shifting, and advanced internal control ergonomics that include easy-to-read instrument data within the steering column and more accessible remote valves.

It also offers unmatched loader visibility, thanks to the standard high-visibility roof panel, and the new climate control system revolutionises in-cab comfort with 10 adjustable vents providing superior control during long days that are hot, cold or dusty.

### Adaptable value

Owners can configure their Farmall according to their unique needs, with a choice of Vision Lift or Prime Lift loaders, and the option of ROPS or cab configuration. It's a reliable, cost-effective utility tractor that can get it all done.

Additionally, complementing the Farmall 95C, 105C and the 115C, a Farmall 75C is available, offering all the features customers have come to expect from Case IH's Farmall range whilst being designed for lighter operations.

"The new Farmall C tractors are your powerful, tough, adaptable and comfortable companions ready to handle any chore – all day long," says Peter. "These tractors truly raise the bar."
