

## FPT INDUSTRIAL IS NOW A PARTNER OF TEKSAN GENERATOR

Turin, June 21, 2018

**FPT Industrial** is now powering **Teksan Generator**, a Turkish company that is one of the main players in its field. Teksan Generator has chosen FPT Industrial for a **long-term partnership** to supply it with the **full FPT Industrial Power Generation G-Drive line-up**. Teksan decided on FPT Industrial due to the important benefits that come from the great know-how it has acquired over its long experience in the market. This has resulted in an offering of products that are **efficient, reliable**, and able to deliver **high performance** while maintaining **low operating costs**.

PRESS RELEASE

Teksan will receive **Unregulated, Stage II and Stage IIIA/Tier 3 compliant** G-Drive engines to fulfill a complete power demand. FPT Industrial's G-Drive covers a power range from **30 kVA** to **600 kVA**, spread between seven models: **S8000, F32, N45, N67, Cursor 9, Cursor 13** and **Cursor 16**. These variants respond to every need, since they offer a displacement from 2,9 to 15,9 liters and many power rates. The **S8000** delivers an output of 30 kVA, it has a low cost of ownership and is a **reliable solution** for all **emergency and prime power** applications.

The **NEF family** will provide Teksan with two different G-Drive models. FPT Industrial will supply the Turkish company with both the **N45** – which has five different power ranges and a displacement of 4.5 liters – and the **N67**, whose power range goes from **130 kVA** to **250 kVA**.

This latest version (N67 250 kVA) is also **best-in-class** for **G-Drive packaging, load acceptance and fuel consumption**.

As for the **Cursor**, the displacement varies from 8.7 to 16 liters, while the power has a range between **300 kVA** and **600 kVA**. These G-Drive engines also have best-in-class perks: the Cursor 9 300 kVA is **best-in-class** for **oil service intervals** (up to 600 hours) and **width** (2% less than competitors' average), while the Cursor 16 600 kVA – which is also the most compact G-Drive on the market - is **best-in-class** for **fuel consumption, service intervals and reduced noise**.

All these products – the unregulated, the Stage II and Stage IIIA/Tier 3 compliant – have great benefits: compared to other premium brands, FPT Industrial's **fuel savings** are up to 5% in the unregulated models and between 2% and 16% in the emissioned ones, while the **maintenance intervals** are up to **300 hours** (unregulated) and up to **100 hours** (Stage IIIA/Tier 3) more than market's average. Moreover, FPT Industrial G-Drive engines have a **switch-ability pack** that allows customers to change from **1.500 rpm to 1.800 rpm** depending on their requests (50Hz or 60Hz).

Thanks to its solid experience, engineering know-how along with its wide distribution network, **Teksan Generator**, a leading engineering company headquartered in Istanbul, has been delivering tailor-made power solutions **since 1994**. Placing itself as one of the main players in its field, Teksan now powers construction sites, telecommunication projects, hotels, hospitals, industrial plants, research centers, shopping malls, residential buildings, sports centers and many other projects **in more than 120 countries** through its **internationally certified quality** diesel and gas-driven generator sets, cogeneration-trigeneration solutions, mobile lighting towers as well as hybrid power systems. All of these qualities find a great partner in **Teksan Generator**, which has not only been providing uninterrupted power solutions delivering high performance even in the most challenging conditions but providing strong technical support, placing itself as **one of the main players in its field**. For more information on Teksan Generator and its applications visit <http://teksan.com>.

*FPT Industrial is a brand of CNH Industrial, dedicated to the design, production and sale of powertrains for on and off-road vehicles, marine and power generation applications. The company employs more than 8,000 people worldwide, in ten manufacturing plants and seven R&D Centres. The FPT Industrial sales network consists of 93 dealers and over 900 service centres in almost 100 countries. A wide product offering, including six engine ranges from 42 hp up to 1,006 hp, transmissions with maximum torque of 200 Nm up to 500 Nm, front and rear axles from 2 to 32 ton GAW (Gross Axle Weight). FPT Industrial offers the most complete Natural Gas engines line-up on the market for industrial applications,*

*including engine ranges from 136 hp up to 460 hp. This extensive offer and a close focus on R&D activities make FPT Industrial a world leader in industrial powertrains. For further information, visit [www.fptindustrial.com](http://www.fptindustrial.com).*
