

## Stralis X-Way tractor unit to make UK debut on IVECO stand at Tip-ex 2019

*IVECO announces Stralis X-Way, Stralis NP and Daily line-up for outdoor exhibition and demonstration areas in Harrogate*

Basildon, May 07, 2019

IVECO's first Stralis X-Way 6x4 tractor unit to arrive on UK shores will take pride of place on its outdoor stand at Tip-ex 2019, just days ahead of its delivery into service with Purfleet-based Brocks Haulage.

The bulk excavation specialist has already added multiple new Stralis X-Way 8x4 tippers to its fleet in 2019, after being impressed by the performance of an IVECO demonstrator. Now, its first IVECO tractor unit will enter service with a wet kit for operating the firm's tri-axle tipping trailers.

The arrival of the Stralis X-Way double-drive tractor AT440X48TZ/P OFF will give the firm a prime mover which combines excellent fuel efficiency and safety technologies with the ultimate comfort of the road-going Stralis cab. It is designed by IVECO to give operators the confidence to tackle 'final mile' deliveries onto construction sites with ease, while ensuring high productivity, safety and excellent total cost of ownership (TCO).

Also on display on IVECO's stand will be a Stralis X-Way 8x4 rigid (AD340X42Z), part of the North East Truck & Van (NETV) demonstrator fleet. This vehicle will feature a Boweld tipper body for heavy-duty work in on/off-road applications.

It's presence at the show will highlight the suitability of the Stralis X-Way for companies in the construction, demolition, waste and local authority sectors. It has been built by IVECO in 'OFF' chassis specification – one of three options available alongside 'ON' and 'ON+'. This ensures the vehicle is suitable for off-road missions, with a set-up combining excellent ground clearance and the ability to tackle steeper approach angles.

It will be exhibited alongside a 3.5-tonne Daily tipper – one of around 11,000 configurations of Daily available in a range which includes vans, chassis cabs, crew cabs and chassis cowl. The Daily Euro 6 is available in the UK at gross vehicle weights from 3.5 to 7.2 tonnes, with wheelbases from 3,000 to 4,750 mm, making it perfect for heavy transport jobs in the construction sector.

PRESS RELEASE

Completing IVECO's Tip-Ex line-up will be a Stralis NP (Natural Power) tractor unit, which will be available for testing on local roads from the dedicated vehicle demonstration area. The Stralis NP stands out for its ability to support the most sustainable logistics thanks to an impressive 99 per cent reduction in particulate matter and 90 per cent in NO<sub>2</sub> emissions compared to Euro VI standards. Plus, when running on biomethane, it reduces CO<sub>2</sub> emissions by as much as 95 per cent.

## IVECO

*IVECO is a brand of CNH Industrial N.V., a World leader in Capital Goods listed on the New York Stock Exchange (NYSE: CNHI) and on the Mercato Telematico Azionario of the Borsa Italiana (MI: CNHI). IVECO designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks, and vehicles for applications such as off-road missions.*

*The brand's wide range of products include the Daily, a vehicle that covers the 3 – 7 tonne vehicle weight segment, the Eurocargo from 6 – 19 tonnes, the Trakker (dedicated to off-road missions) and the Stralis, both over 16 tonnes. In addition, the IVECO Astra brand builds off-road trucks, rigid and articulated dumpers as well as special vehicles.*

*IVECO employs close to 21,000 individuals globally. It manages production sites in 7 countries throughout Europe, Asia, Africa, Oceania and Latin America where it produces vehicles featuring the latest advanced technologies. 4,200 sales and service outlets in over 160 countries guarantee technical support wherever an IVECO vehicle is at work.*
