

The latest New Holland CR Revelation combine harvesters arrive to Russia

*In Russia, **ASB Agricultural Holding** is the first buyer of **18 CR Revelation combine harvesters** with a unique two-rotor threshing system. The combines were shipped by NTC, Nauchno-Tekhnicheskij Centr, the official dealer of New Holland Agriculture in the North Caucasus Federal District.*

Stavropol, 09 July 2019

The first batch of 18 **New Holland CR7.90 combine harvesters** was purchased by ASB agricultural holding as part of the fleet renewal of three of its companies in preparation for the harvesting season. This is the largest supply of New Holland rotary machines to the south of Russia over the past five years.

The CR Series unites high performance and perfect grain quality thanks to the uniquely patented Twin Rotor™ threshing system. The Opti-Clean™ system allows achieving the industry's best 0.1% for the cleanest grain samples. A variable speed drive for the header and the crop feed elevator chosen by the client optimizes the flow of incoming mass to the rotors, which is important for high-quality harvesting. The new CR Series has an additional advantage: increased engine power for those working conditions that require increased load on the machine. The ABS companies cultivate a lot of tilled crops with traumatic stubble. Therefore, the combines have been equipped with the best tires for reduced pressure on the soil.

The reliable and proven FPT Cursor 9 engine (8.7l) provides users with high performance in the field. The grain tank capacity is 9.500 litres.

The entire batch of 18 combines is equipped with a PLM monitoring system. This option allows to track all the parameters of the combines in real time from anywhere in the world.

The new CR combines offer the highest comfort for operators. Cabin volume is increased to 3.7 cu. m and the glazing area is 6.3 sq. m. The wide curved window of the Harvest Suite cabin guarantees a perfect view. The floor in front of the cab slopes down into the front windshield, which gives the operator an excellent overview of the header. Side glass allows you to easily control the process of unloading. A refrigerator for beverages and food, as well as a handwash tank, have been added to the air conditioning and filtration system.

PRESS RELEASE

“We have a long-standing partnership with NTC,” emphasised Anton Sergeevich Schendrigin, ASB Deputy General Director for Production. This is a company that not only offers technology, but a complete solution for agribusiness, highly skilled and professional specialists, and continuous support. Thanks to these new combines we are now ready to face all the challenges of large-scale agricultural mechanisation and we aim to achieve the highest results in the upcoming harvesting season.”

New Holland representatives and the NTC dealer service team are expected at the ABS Agro Holding’s farms this summer to conduct a series of field operator training with the purpose to maximise the field productivity of the CR combines during the harvest season.
