

IVECO localizes production of Eurocargo garbage collection truck in Kazakhstan

IVECO “Made in Kazakhstan” Stahlbau garbage collector body on Eurocargo chassis enters the market.

Nur-Sultan, July 2019

IVECO announced today the full localization of production of garbage collectors based on its Eurocargo chassis in cooperation with Stahlbau, the specialist in the design of municipal and urban vehicles for the most complex missions in harsh conditions and supplier of municipal vehicles in Kazakhstan. The Stahlbau plant, which is located in Industrial park, Nur-Sultan city, has been certified by different Eurasian government institutions – the Republic of Kazakhstan National Chamber of Entrepreneurs, the Ministry for Industry and Trade of Russia, and the International Quality Center (IQC) – and the vehicle is marketed in the Eurasian Union as “Made in Kazakhstan”.

Roberto Valfrè, Business Director for CNH Industrial Central Asia, stated: “We are very pleased that the localisation process of this vehicle has been successfully completed. The garbage collector on Eurocargo chassis offers excellent benefits in terms of efficiency and low Total Cost of Ownership. Thanks to the localization, we are now able to add the benefit of very competitive pricing for our customers in the Eurasian Union, as the ‘Made in Kazakhstan’ vehicle and chassis are not subject to custom duties.”

The sustainable and maneuverable Eurocargo is ideal for municipal missions with the narrow turning circle of less than 12 m and short wheelbase of 3690 mm, and the exceptionally low fuel consumption. The 8-mm thick hardox metal allows to increase the structural stiffness of the garbage collector’s body. The lightweight chassis construction results in higher payload and carrying weight. The Eurocargo stands out for the variety of available options and wide range of chassis models makes. Eurocargo is equipped with the IVECO EuroV Tector 6-cylinder 6-litre Common Rail engine.

Customer feedback highlights the fast service provided by Stahlbau specialists and the great garbage collector’s performance produced in tandem by IVECO and Stahlbau.

PRESS RELEASE

Brief tech. specs of SB-16 garbage collector on Eurocargo chassis:

Emission	EURO V
Commercial Name	E25
Cooling	Water
Injection	High Pressure Common Rail (TAA HPCR) Electronic - Direct
N. of cylinders	6 cylinders
Total displacement	5880 cc
Max Power output, @ speed	252 HP (185 KW), @ 2700 rpm
Max Torque, Peak Torque speed	850 Nm, @ 1250 rpm
Cold starting	Yes (available with Grid Heater)
Body volume	16 m3
Hopper volume	2.4 m3
Minimum loading height	1000 mm
Trash compressing ratio, customizable	Up to 7:1
Loading mech.	Tilter with universal grip for all types of containers from 120 to 1100 L
Loading capacity of the loader	500 kg (allowed by the manufacturer) Max - 800kg
Work cycle duration	19-22 sec

IVECO

IVECO is a brand of CNH Industrial N.V., a World leader in Capital Goods listed on the New York Stock Exchange (NYSE: CNHI) and on the Mercato Telematico Azionario of the Borsa Italiana (MI: CNHI). IVECO designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks, and vehicles for applications such as off-road missions.

The brand's wide range of products include the Daily, a vehicle that covers the 3.3 – 7.2 ton vehicle weight segment, the Eurocargo from 6 – 19 tons, the Trakker (dedicated to off-road missions) and the Stralis, both over 16 tons. In addition, the IVECO Astra brand builds off-road trucks, rigid and articulated dumpers as well as special vehicles.

IVECO employs close to 21,000 individuals globally. It manages production sites in 7 countries throughout Europe, Asia, Africa, Oceania and Latin America where it produces vehicles featuring the latest advanced technologies. 4,200 sales and service outlets in over 160 countries guarantee technical support wherever an IVECO vehicle is at work.
