

## **Case IH Axial-Flow 4099 crowned “Harvester of the Year” in the China Agricultural Machinery Top 50**

*The Case IH Axial-Flow 4099 has been named in the Top 50 Chinese agricultural machines for 2018 and has received the prestigious “Harvester of the Year” title in recognition for the model’s outstanding design and performance.*

Wuhu, Anhui Province, China, July 20, 2019

The Case IH Axial-Flow® 4099 combine harvester has won the "Harvester of the Year" crown at the 7th China Agricultural Machinery High-End Forum (CAIF 2019) and the 2018 China Agricultural Machinery Top 50 Product of the Year (TOP50+) Awards Ceremony, held in Wuhu, Anhui Province, China.

The prestigious title recognises the Axial-Flow 4099 for its advanced design and excellent performance in the field.

As the annual event of the agricultural machinery industry, the China Agricultural Machinery High-End Forum plays an important role in the development of the country’s agricultural machinery industry. The Top 50 Product of the Year (TOP50+) Awards highlight the leading models amongst the different types of agricultural machinery products.

Mr. Edward Tsui, Agricultural Marketing Manager for CNH Industrial China, attended the forum, saying; “The Case IH Axial-Flow 4099 combine harvester was launched in 2018 and is the newest model of the Axial-Flow 4000 Series. It delivers innovative features to enhance productivity including improved engine horsepower, harvesting efficiency, increased header width and grain capacity. We are very honoured that this Case IH harvester has won this highly-esteemed prize.”

### **A new experience to improve harvest**

The Case IH Axial-Flow 4099 combine harvester received its Harvester of the Year title thanks to a wide range of features, including a highly efficient FPT Industrial 6.7L engine. The in-line six-cylinder engine is rated 230hp but provides up to 260hp maximum power, which is powerful enough to meet most operational needs.

A new lateral tilt feeder channel enables the Axial-Flow 4099 to handle the heaviest headers while ensuring perfect ground contour following, which makes the cutting uniform and ensures better harvesting.

The patented Axial-Flow rotor adopts a grain-on-grain threshing action, which reduces grain loss and improves separation. The Cross Flow® cleaning system delivers a better cleaning performance and higher grain harvest quality. The large, 6500L capacity grain tank maximises the time spent harvesting by reducing the frequency of unloading. The luxury cab with suspension seats, multi-function handle, right-hand console and column display, means the Axial-Flow 4099 is easy to operate and provides drivers with a more comfortable environment for long days in the field.
