

New Holland presents new orchard tractor for South Africa at the second Nampo Cape 2019

- From the 4th to 6th of September in Bredasdorp, Western Cape, New Holland Agriculture is participating at the second annual **Nampo event** showcasing its new product offering.
- The latest New Holland **TD3.50F tractor** for orchards and vineyards, the **T5.S Electro Command™** and **TS6.120 High Clearance tractors**, the **Guardian™ SP310F front boom sprayer** and **CR7.90 IntelliSense™ combine** are all being presented for the first time in Bredasdorp.
- New Holland is hosting a Customer day for current and prospective customers.

Bredasdorp, 4th September 2019

New Holland Agriculture is looking to make a big impression at the second annual Nampo event, the **Nampo Cape 2019**, which is being held in Bredasdorp from the 4th to 6th September. New Holland is present with new products for its customers on the south-western coast of the country.

The latest New Holland **T5.S Electro Command™** and **TS6.120 High Clearance tractors**, the **Guardian™ SP310F front boom sprayer**, the **CR7.90 IntelliSense™ combine** and - most importantly for the Western Cape region - the **TD3.50F tractor** for orchards and vineyards, have made their debut today in the Western Cape province of South Africa, being presented to farmers and customers at the show.

During the show, New Holland is also organising a customer day on the 5th of September at its stand (71 and 78). The customer-dedicated day is split into two sessions allowing customers to explore the new products while interacting with the New Holland sales and product marketing team.

New TD3.50F tractor extends New Holland's extensive offering for South African vineyard and orchard farmers

For the vineyard and citrus producers, the new **TD3.50F** is the ideal solution for working with table grape vineyards. New Holland TD3.50F ROPS platform 4WD and 2WD tractors have earned a reputation for dependable and versatile performance in the sub-50 hp category. Combined with a proven record for whole low lifetime operating costs, the TD3.50F is the tractor of choice for orchards, vineyards and as a general workhorse across a wide range of enterprises. By reducing the overall length, stability is improved too, the tractor having a longer wheelbase to enhance its performance when fitted with a

front loader or heavy mounted attachment. With its stylish new look, wide platform improved comfort and proven rugged build, the TD3.50F now offers even better performance and value just as you would expect from New Holland.

The **Guardian™ SP310F front boom sprayer** is the easiest way to spray, combining rugged construction with an innovative design, which saves time. With the boom in front, you never look back because the operator gets the best view of the spray nozzles and the field ahead to confidently cover ground faster. And with redesigned lift arms and a chassis with 1.8-metre clearance, the SP310F gives an even more unobstructed view. The spray is delivered into the crop before the tyres go over it, eliminating the potential for dust to neutralize the spray. Tanks are available with 3,800- or 4,500-litre capacity, and there are five available boom sizes, ranging from 27 to 41 metres.

The **T5.S Electro Command™ Series** tractors are fitted with the FPT Industrial S8000 4-cylinder engine with intercooled turbocharger, with three models offering power outputs of 65kW, 72kW and 81kW. The Electro Command™ semi-automatic transmission, with 16 forward and 16 reverse gears, differentiates this tractor from others on the market. The T5 Series can be equipped with 540/540E/1,000 rpm PTO with ground speed, as well as 84 l/min hydraulic flow and close centre remotes. The 145-litre fuel tank makes it possible to work long hours without interruption.

The **TS6.120 High Clearance** tractor is characterised by unprecedented ground clearance of 645mm and a rated power output of 88kW, enabling use with greater implements to increase productivity. When connected to a 16x8 dual-power synchronized hydraulic shuttle with creeper transmission, and with 83 l/min hydraulic pump flow, this tractor can do all the spraying required. A 540/1,000 rpm PTO is part of the package.

The **CR7.90 IntelliSense™** combine has the powerful 449 hp FPT Industrial Cursor 9 engine and the Twin Rotor™ technology, which achieves best-in-class grain and straw quality thanks to its gentle multipass action. Grain cracking, at an industry-leading level of just 0.1%, is a thing of the past. Opti-Clean™ ensures the cleanest grain sample and there are two types of rotor to choose from. Advanced harvesting technology, including IntelliSteer® auto-guidance, means that harvesting can continue around the clock without stopping. Innovative features such as the SmartTrax™, IntelliCruise™ and Opti-Spread™ systems further enhance productivity.
