

Fidelity mutual funds win 25 U.S. LSEG Lipper Fund Awards

20 Fidelity Mutual Funds Recognized for Strong Long-Term, Risk-Adjusted Returns

The 20 Fidelity mutual funds recognized by LSEG Lipper range across a variety of asset classes and styles, from equities, fixed income and asset allocation to international, high income and sector funds.

“Our investment professionals delivered outstanding results for Fidelity’s shareholders throughout the year, a commitment underscored by recognition from the Lipper Fund Awards. Their expertise and disciplined approach continued to drive the long-term, risk-adjusted performance that supported solid financial and operating outcomes across Asset Management and the firm. As we enter 2026, we are well-positioned for continued success by executing with focus and innovating for our customers.”

In general, the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Stock markets are volatile and can fluctuate significantly in response to company, industry, political, real estate, regulatory, market, or economic developments. Investing in stock involves risks, including the loss of principal.

Foreign markets can be more volatile than U.S. markets due to increased risks of adverse issuer, political, market or economic developments, all of which are magnified in emerging markets. These risks are particularly significant for funds that focus on a single country or region.

Because of their narrow focus, sector funds tend to be more volatile than funds that diversify across many sectors and companies.

Class I shares are sold to eligible investors without a sales charge or 12b-1 fee.

Classes Z/Z6 are available only to eligible investors as described in the fund’s prospectus.

The LSEG Lipper Fund Awards, granted annually, highlight funds and fund companies that have excelled in delivering consistently strong risk-adjusted performance relative to their peers. The LSEG Lipper Fund Awards are based on the Lipper Leader for Consistent Return rating, which is a risk-adjusted performance measure calculated over 36, 60 and 120 months. The fund with the highest Lipper Leader for Consistent Return (Effective Return) value in each eligible classification wins the LSEG Lipper Fund Award. About Lipper Rating System

Consistent Return

A Lipper Leader for Consistent Return is a fund that has provided superior consistency and risk-adjusted returns when compared to a group of similar funds. Lipper Leaders for Consistent Return may be the best fit for investors who value a fund’s year-to-year consistency relative to other funds in a particular peer group.

Investors are cautioned that some peer groups are inherently more volatile than others, and even Lipper Leaders for Consistent Return in the most volatile groups may not be well suited to shorter-term goals or less risk-tolerant investors.

How Lipper Leaders are Rated for Consistent Return

Lipper Leader ratings for Consistent Return reflect funds’ historic returns, adjusted for volatility, relative to peers. Ratings for Consistent Return are computed for all Lipper classifications with five or more distinct portfolios and span both equity and fixed-income funds (e.g., large-cap core, general U.S. Treasury, etc.)

The ratings are subject to change every month and are calculated for the following time periods: 3-year, 5-year, 10-year, and overall. The overall calculation is based on an equal-weighted average of percentile ranks for the Consistent Return metrics over 3-year, 5-year, and 10-year periods (if applicable). The highest 20% of funds in each classification are named Lipper Leaders for Consistent Return. The next 20% receive a rating of 4; the middle 20% are rated 3; the next 20% are rated 2, and the lowest 20% are rated 1.
