Ford Temporarily Pauses Production at Kansas City Assembly Plant (Transit Side) to Deep Clean, Following Safety Protocols for COVID-19 Case

“The safety of our workforce is our top priority. Working closely with the UAW and external experts in infectious disease and epidemiology, we have developed safety standards to protect our workforce. In this instance, our protocol calls for us to deep clean and disinfect the employees’ work area, equipment, team area and the path that the employee took while at the plant today. We are temporarily pausing production at Kansas City Assembly Plant – on the Transit side – until the deep cleaning is completed. We are notifying people known to have been in close contact with the infected individual and asking them to self-quarantine for 14 days.”
