New GLS hub in Sibiu: larger and more modern

Sibiu, 10 October 2018. Following the continuous expansion and development, but also the increasing parcel volumes, GLS Romania has opened a new transshipment point in Sibiu county.

In the beginning of August, GLS moved to Industrial Park Șelimbăr, where the new construction occupies 4.200 square meters, three times more than the older location. This has allowed the setup of 55 loading-unloading gates and twice the parcel processing capacity. Once with the new location, the number of parcels processed daily has increased from 25.000 to 50.000 on a daily basis, because of the newest conveyor belts.

The construction of the new location began in September 2017, reaching a total investment of over 5 million euros. With the help of the special lane destined for small parcels, the latter are manipulated separately, safely reaching consignees.

Better conditions for employees

The new construction and state-of-the-art technology translate into speed and quality of service for customers, and in welcoming workplace conditions. The location has allowed the modern setup of the building, so that the environment in which employees work is improved. Modern technology allows employees, and mainly new employees, to get familiar with the work in a parcel company much faster and easier.

Unique services at GLS

The main point that distinguishes GLS from other parcel companies on the market is *FlexDeliveryService*. Through this service, the consignee has the freedom to influence and control delivery. By accessing the webpage www.coletulmeu.ro, the consignee can change the parcel's delivery address or date of delivery, but also the delivery method, based on their preferences.

GLS Romania and the GLS Group

GLS Romania is a subsidiary of General Logistics Systems B.V. (headquartered in Amsterdam). GLS realises reliable, high-quality parcel services for over 270,000 customers, complemented by logistics and express services. "Quality leader in European parcel logistics" is GLS' guiding principle, sustainability being one of the core values. Through wholly owned and partner companies, the Group provides a network coverage of 41 European states. GLS is also present in eight U.S. states and in Canada, and is globally connected via contractual agreements. About 50 central transshipment points and more than 1,000 depots and agencies are at GLS' disposal. With its ground based network GLS is one of the leading parcel service providers in Europe. GLS counts 18,000 employees and every day around 30,000 vehicles are on route for GLS. In the financial year 2017/18 GLS achieved revenues of 2.9 billion euros and transported 584 million parcels.
