

The importance of having the correct tyre pressure.

SAVE...

* Internal estimate based on a 40 ton 4x2 tractor with tri-axle trailer operating in long haul service driving with the correct pressure vs. the same type of truck having 1.5 bar under-inflation on all axles; with an average fuel consumption of 30l/100 km with an annual mileage of 100,000 km; based on a diesel price of €1.36 per litre including VAT. Actual results may vary based on - road and weather conditions, driving style, wear conditions, tyre size, tyre pressures and vehicle maintenance.
