

FPT INDUSTRIAL AND SENNEBOGEN ANNOUNCE PARTNERSHIP

Turin, April 2016

Leading powertrain supplier FPT Industrial is pleased to announce a partnership with crane technology and material handling company, SENNEBOGEN Maschinenfabrik GmbH. Through the partnership FPT Industrial will supply their market leading N45 engines to Sennebogen's new telescopic 16 t cranes 613 E-series.

The N45 Tier 4 Final/Stage VI engine is part of FPT Industrial's NEF Series, recognized for offering high-performance, reliable, cost-effective and compact solutions powering construction vehicles and machinery and power generators.

The 4.5-litres, four-cylinder in-line engine, provides Sennebogen's new telescopic E-series crane with a maximum power 92 kW and 560 Nm of torque at 1,500 rpm. It features state-of-the-art technologies, such as the latest generation Common Rail injection system, and is characterized by high power and high torque, especially at low rpm, ideal to increase productivity in construction applications.

Compliance with Tier 4B/Stage IV emissions levels is guaranteed through the use of FPT Industrial's patented High Efficiency SCR (HI-eSCR) system. Without the need for an exhaust gas recirculation (EGR) or a diesel particulate filter (DPF), it reduces emissions of Nitrogen Oxides (NOx) by more than 95% through the use of SCR only.

Sennebogen's Telescopic Crane 613 E-series is representing the first model to be powered by FPT Industrial, and includes a newly designed cab and exterior. A wheeled version of the crane will be displayed at the upcoming Bauma show in Munich, Germany 11-17 April 2016.

FPT Industrial was chosen for its outstanding reputation for highly fluid efficient, robust and qualitative engine technology, allowing its products to achieve high performance in terms of load response, maximum torque and power. The partnership comes after a comprehensive research and development programme.

Sennebogen is a family-owned company founded in 1952 in Germany. They are world leaders in crane technology and material handling, with more than 1,200 employees worldwide and a turnover of € 300 million. Sennebogen designs and manufactures a manifold product range consisting of crawler cranes, telescopic cranes, duty cycle cranes, harbor cranes, material handling machines, multi-loaders and base carriers.

***FPT Industrial** is a brand of CNH Industrial, dedicated to the design, production and sale of powertrains for on and off-road vehicles, marine and power generation applications. The company employs approximately 8,200 people worldwide, in ten manufacturing plants and six R&D Centers. The FPT Industrial sales network consists of 93 dealers and over 900 service centers in almost 100 countries. A wide product offering, including six engine ranges from 31 kW up to 740 kW and transmissions with maximum torque of 200 Nm up to 500 Nm, and a close focus on R&D activities make FPT Industrial a world leader in industrial powertrains.
