

Fact sheet: Responsibility Highlights

Interim responsibility data for first half of 2016 from 1 January – 30 June

	2016	2015	Target (full year)
Responsibility data 1 January – 30 June			
Product recalls	0	0	0
Injury rate with absence	1	1.5	1.5
Females appointed and recruited	41.4%	44%	>40%
Energy efficiency improvement	5.5%	5.7%	>2.5%
Recycled waste	92.7%	93%	92%
Supplier quality non-conformity resolution rate	100%	100%	100%
Supplier Code of Conduct non-conformity resolution rate	100%	100%	100%

Supplier Code of Conduct non-conformity resolution rate (interim)

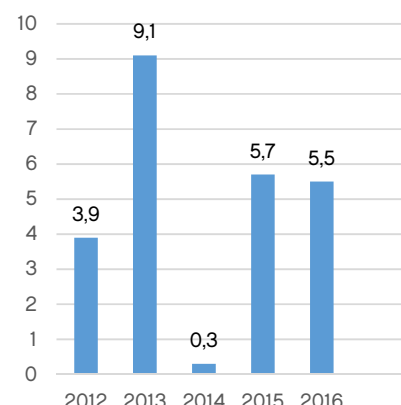

■ Supplier Code of Conduct non-conformity resolution rate (%)

Injury rate (interim)

■ Injury rate (per. mio. work hrs)

Energy efficiency improvement (interim)

■ Energy efficiency improvement (%)

Notes:

Energy efficiency:

The energy efficiency improvement is calculated as the rate between energy consumption and raw materials used. The data is shown with the previous year as baseline. Energy loss relating to energy generations from onsite power plants is excluded from the energy consumption, as this is not considered part of the company's core activities.
