FITTED AS OPTION

NOT AVAILABLE

#### Verdict

The NV400 is a re-badged Renault Master. However, the AEB system available on the Master is not offered on the NV400. The blind-spot information system which Nissan claim is an option proved impossible to get. The performance of those few safety systems which are available was mediocre. In short, consumers interested in safety should look elsewhere.

#### Comment

Very little safety equipment is offered on the NV400, even as an option. Autonomous emergency braking (AEB) and forward collision warning (FCW) are not available.

A lane departure warning system is available as an option. This warns the driver when the vehicle is drifting out of lane. The system met Euro NCAP's requirements for solid and dashed lane markings and was rewarded. Nissan claim that a blind-spot information system is available as an option. However, Euro NCAP was unable to locate any vehicle with this feature so the system was not rewarded in these tests

The NV400 does not have a speed limit information function. Only a driver-set speed limiter is offered as an option. In Euro NCAP's tests, this failed to maintain the vehicle speed with sufficient accuracy and was not rewarded.

A seatbelt reminder is standard equipment on the driver's seat. However, no such reminder is available for the passenger seat. Driver-state monitoring, which warns of fatigued or impaired driving, is also not available.
