Tradition Meets New Technologies for a State-of-the-Art Museum Experience

### **The Porsche Museum Extends its Digital Offering**

**Stuttgart.** With virtual live tours, mixed-reality formats, a new app and Facebook presence plus an innovative parking concept, the Porsche Museum is picking up the pace with its digital offering. With immediate effect, people from all over the world can also experience the sports car manufacturer's museum virtually in real time. Fans can follow a museum guide on the <http://www.porsche.com/museum/en/> website from the convenience of their screen at home through the special exhibition entitled "New ways. Every aim. Always Porsche." Porsche fans who live too far to visit in person will be among those set to benefit from the new virtual tour.

"This solution helps us to make the Porsche brand and the unique history of the company tangible for a wider group of people around the world", explains Achim Stejskal, Director of the Porsche Museum, highlighting the new opportunities offered by digitization. "Whether you are based in the USA, China or Brazil – everyone in all countries and regions of the world will be able to interact with us online. The virtual tour gives users the feeling of being right there in the exhibition." The Porsche Museum has implemented the free virtual museum tours with help from Porsche Digital GmbH, a wholly-owned subsidiary of Porsche AG, and the UK-based start-up company GoInStore. According to Thilo Koslowski, CEO of Porsche Digital, the collaboration with the British start-up is another logical step in the company's digitization campaign: "This pilot project with the Porsche Museum gave us new ideas for future concepts and customer experiences."

The digital experience is being further extended within the permanent exhibition using “Microsoft HoloLens” technology: During the “Porsche Holographic Design Tour”, a hologram of Porsche Designer Matthias Kulla explains the classic design features and design language of Porsche using a real 911 as an example. To interact with this technology, visitors put on a pair of glasses that projects interactive 3D animations onto a real 911. “This format gives visitors a unique experience within an architecturally appealing environment”, explains Achim Stejskal. The Porsche Museum and the Porsche Style design department have developed this experience in cooperation with Microsoft.

Parking at the museum is also being improved thanks to a new digital feature: Visitors to the Porsche Museum can now enjoy much faster access to the museum. The barrier to the underground museum car park is opened with an electronic parking ticket stored in the vehicle, and in future the barrier will open automatically. This new feature means that there is no need for drivers to obtain a paper ticket, and parking charges can be settled conveniently at the end of the month. Cologne-based start-up company Evopark developed the app that has made it all possible. The app also shows free spaces in the underground car park and navigates drivers directly to a space by request.

### **The Porsche Museum as an App and on Social Media**

Visitors can now arrange their time on-site at the Porsche Museum in a more personalized way: Using the free “Porsche Museum” app, visitors can access all of the information they need for their own tour through the exhibition as well as the technical data that accompanies the exhibits. Information about opening times and prices complete the offering from the app, which is available for iOS devices in the Apple App Store and for Android devices in the Google Play Store. During their tour of the exhibition, visitors can also choose their favorite vehicles from among the exhibits and share them on social networking platforms in the form of an electronic post card,

making the “Porsche Museum” app a useful companion for well-connected culture and car fanatics.

On [www.facebook.com/porsche.museum.stuttgart/](http://www.facebook.com/porsche.museum.stuttgart/), the museum curators share detailed insights into the company history as well as actively taking their followers with them when they attend rally experiences around the world or the museum's own events. Porsche fans can share their likes and comments on social networking sites in real-time during their visit to the museum by logging into the free on-site Wifi available throughout the entire building.
