Introduction

In this brief report we have ranked the Global Top 100 companies by market capitalisation and highlighted the major trends since 2009 as they emerged from the global financial crisis.

Key highlights

- The market capitalisation of the Global Top 100 has increased by 15% since last year. This compares with a 11.5% increase in the MSCI World Index.
- **Apple** retains the pole position for the seventh year in a row. Apple's market cap increased by 13%, although the gap with second placed Alphabet has decreased by 25%.
- The **Top four** companies are unchanged compared to last year. There are two new entrants in the **Top ten**, Chinese technology companies, Tencent and Alibaba, replacing US companies Exxon Mobil and Wells Fargo.
- For a second year in a row, **Technology** was the largest sector in terms of market cap (\$4,806bn). Second place was the Financials sector (\$4,421bn), but with the highest number of companies (23) and Consumer Goods (\$2,827bn) came third.
- The **US still dominates** - 54 out of 100 are US companies. This has dropped, however, from 55 in the previous year. Two of the top ten US companies from last year have been replaced by Chinese companies.
- Share buybacks boosted the 2.2% dividend yield to an overall of 3.5% by reference to market capitalisation.

The race to land a trillion dollar market cap

- **Apple is still the world's most valuable public company.**
- However **Amazon, Microsoft, Alphabet** and **Apple** are all in the running to become the first ever company to be valued at one trillion dollars, with analysts believing that this could happen by end of 2018.
- Microsoft's value overtook Alphabet for the first time in three years on 12 April 2018 and has overtaken Alphabet on a number of occasions since then – as shown in the graph.

Market cap of the Global Top 100 by world region

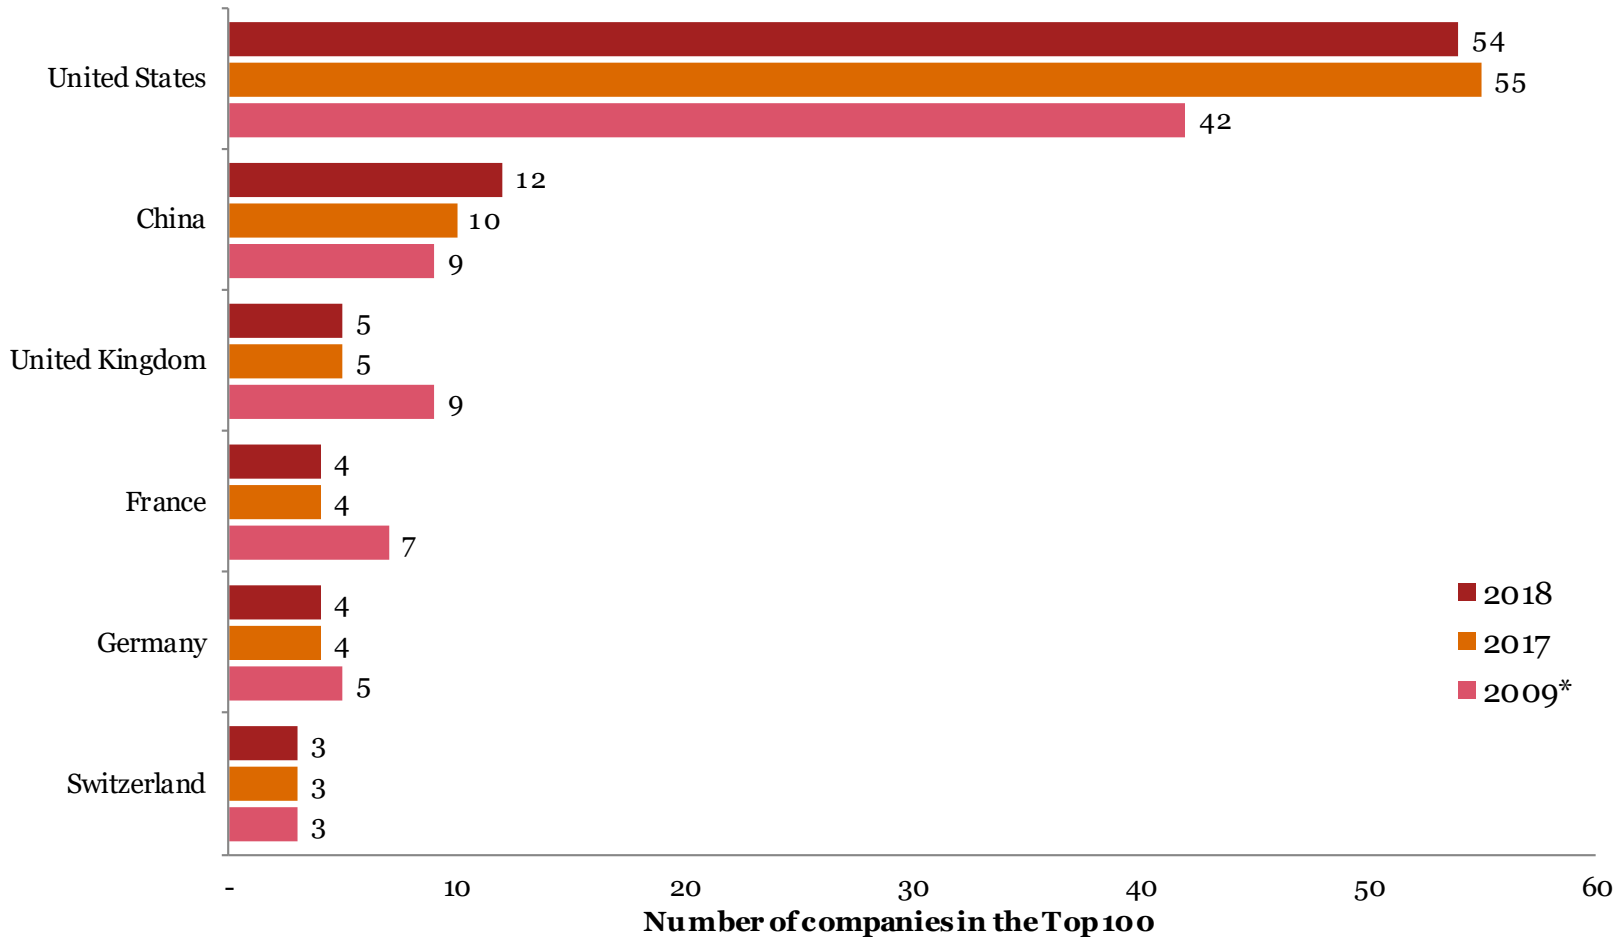

- The **US** has seen an impressive growth of its share of the largest companies since 31 March 2009. This has dropped, however, from 55 in the previous year and two of the top ten US companies from last year have been replaced by Chinese companies. By market cap, the US share was 45% at 31 March 2009 rising to 61% in 2018.
- Europe** was badly hit by the financial crisis and nine companies fell out of the Top 100 between 31 March 2009 and 2017. In 2018, however, there was an increase of one company. By market cap Europe represented 27% at 31 March 2009 dropping to 17% in 2018.
- China** had fluctuated between seven and nine companies between 2009 to 2014, before stabilising between 2015 and 2017 at the level of ten companies. 2018 saw the highest increase in the period, rising to 12 companies. By market cap, China's share increased marginally to 14% at 31 March 2018 from 13% at 31 March 2009.
- The **Rest of the World** saw two companies drop out of the Top 100 in the last year and a drop of \$15bn in market cap. Japan saw the biggest loss out of all of the locations and South Africa joined the Top 100 with its first company - Naspers.

comparison:
2018 vs. 2017**

**Post-financial
crisis comparison:
2018 vs. 2009**

**Highlights
and trends**

**Complete
ranking**

Key highlights

- Top 100 companies market cap **increased by 15%** compared to 31 March 2017.
- The **US** is the largest contributor of the Top 100, gaining \$1,259bn to total \$12,187bn.
- **China**, the second largest contributor to the Top 100, saw an increase of 57% when compared to the Top 100 companies at 31 March 2017, totalling \$2,822bn.
- 85 companies from 2017 survived to be in the list at 31 March 2018 – a decrease of 7% compared to last year (91 companies from the 2016 Top 100 list were on the 2017 list).
- There were **no direct entries via IPO** this year. The last company to enter the Top 100 via IPO was Alibaba in 2014.
- The market cap of the most valuable company at 31 March 2018, **Apple, increased by 13%** to \$851bn. The US still has the highest combined market capitalisation of national Global Top 100 companies (\$12,187bn), a 12% increase since 31 March 2017.
- 2018 has not seen much change in the location split compared to 2017: the US dominates with **54 US companies in the Global Top 100** (55 in 2017, 42 in 2009). **China holds the second position with 12 companies** (two more than last year and three more than 2009) and the UK comes third with five companies (no change from last year, there were nine in 2009).
- The threshold to enter the Top 100 has increased to \$97bn this year, compared to \$88bn in March 2017.

Between 2017 and 2018 there were 15 new entrants to the Global Top 100

Source: Bloomberg and PwC analysis

Between 2017 and 2018 the total market cap of the Global Top 100 increased by \$2,597bn

Highlights
and trends

Complete
ranking

Key highlights

- **61** companies from the 2009 Top 100 survived to be in the list at 31 March 2018.
- **Three** companies entered the Global Top 100 **by IPOs and one by spin-off**. IPOs: Alibaba (2014), Facebook (2012) and Agricultural Bank of China (2011). Spin-off: AbbVie (2013).
- The two main risers since 2009 are **Technology companies - Apple and Alphabet**. Facebook (based on value increase since IPO) and Amazon.com come next, though the latter's status as an e-retailer classifies it within Consumer Services. All are US companies.
- In fifth place is **Tencent**, the Chinese technology company. Tencent's market cap has increased by \$483bn (2161%), from \$13bn at 31 March 2009 to \$496bn at 31 March 2018.
- The threshold to enter the Global Top 100 in 2018 was **\$97bn** market cap. In 2009, \$40bn was sufficient.

Spread of market capitalisations in the Global Top 100 as at 31 March

Spread of companies by market cap (2018 vs. 2009)

- 73 companies of the Global Top 100 had a market capitalisation less than \$100bn as at 31 March 2009
- Nine companies of the Global Top 100 had a market capitalisation less than \$100bn as at 31 March 2018
- The average market capitalisation as at 31 March 2009 was \$84bn, while the average market capitalisation as at 31 March 2018 was \$200bn

The industries

Key highlights

- Three industries show significant upward trends in their market cap: **Technology** (+433%), **Consumer Services** (+399%), and **Financials** (+222%) are the leading sectors to have grown their market cap in the Top 100 since 2009, driven by innovation and recovery from the financial crisis.
- **Utilities** industry (four companies in 2009) has been absent from the Top 100 for six years.

The ranking methodology

Methodology

- The Global Top 100 list ranks the largest public companies by their market capitalisation in US\$ as at 31 March 2018 and compares this with the Top 100 list as at 31 March 2017 and 2009
- Data source is Bloomberg, with PwC analysis
- Industry classification is based on Industry Classification Benchmark (ICB)
- Exchange Traded Funds (ETFs) and closed end funds are excluded from the analysis
- We allocated dual-listed companies as follows: BHP Billiton (AUS), Royal Dutch Shell (UK) and Unilever (NL)
- The ranking does not compensate for changes in currency exchange rates
- The distribution of value is based on dividend payments and share repurchases in the calendar year 2017
