## Walpole, Massachusetts Manufacturing and R&D Facility

- Siemens is investing \$300M in the Siemens Healthineers Walpole, Massachusetts advanced manufacturing and R&D facility over the next four years.
  - The groundbreaking marks the beginning of the expansion phase to add or renovate 300,000 square feet.
  - The renovation and expansion will include manufacturing, warehouse, office and lab space.
  - The facility was built in 1979 and the last expansion occurred in 2007.
- We have hired more than 60 new employees. We anticipate creating up to as many as 700 new high-tech, permanent jobs to bring the total employment at the site to between 1,300 and 1,600 by 2026.
  - Positions will include: PhD Scientists, Biochemists, Laboratory Technicians, Manufacturing Technicians, Process Engineers, Mechanical Engineers, Mechanical Technicians, Production Workers, Quality Assurance Professionals, Quality Engineers, Quality Control Specialists, Planning Specialists, Procurement Specialists, Project Management, Facility Maintenance and EHS Professionals.
  - These employees will join the 46,000 Siemens Healthineers around the world who enable healthcare providers to deliver excellent patient care.
  - The Walpole expansion will add to Siemens' employee base of approximately 50,000 people throughout all 50 states and Puerto Rico.
- The Walpole facility is one of Siemens' 60+ U.S. manufacturing sites that work with more than 36,000 U.S. suppliers.
  - The U.S. manufacturing sites last year shipped more than \$5 billion worth of products around the world, making the company a net-exporter.
- The Siemens Healthineers Walpole facility is a key R&D and manufacturing facility for our laboratory diagnostics assays.
  - Siemens Healthineers provides more than 10 billion diagnostic tests globally each year.
- The buildings are designed to meet LEED Gold and the most rigorous international regulatory (cGMP), safety, and environmental standards.
- Siemens' building automation and electrical technologies will minimize operating cost and ensure reliability.

# Fact Sheet

---

- Siemens Desigo™ Building Automation System can integrate a number of building functions and provide real-time visualization in one easy-to-read location – enhancing the user experience and reducing the time it takes to create comprehensive and useful data and reports.
- Large scale manufacturing processes utilize Siemens SIMATIC PCS7 advanced Process Control systems. SIMATIC PCS 7 is Siemens' software application for process control systems. It is designed to integrate automation systems across a plant floor and provide data transparency for safety, productivity and flexibility.

###

**Siemens Healthineers** is the separately managed healthcare business of Siemens AG enabling healthcare providers worldwide to meet their current challenges and to excel in their respective environments. A leader in medical technology, Siemens Healthineers is constantly innovating its portfolio of products and services in its core areas of diagnostic and therapeutic imaging and in laboratory diagnostics and molecular medicine.
