

CV Stefan Woronka

Stefan Woronka joined Siemens in 1997 and held various positions in consulting, business development and sales for Siemens in Germany. In 2010 he joined the Process Automation unit of Siemens in Karlsruhe to start the Industrial Security business. He was responsible for creation and alignment of the portfolio, regional rollout and development, and alignment with other Siemens units. In 2014 he took over the project lead for an internal project to develop a holistic security concept for Siemens for two Siemens divisions (Digital Factory and Process Industries & Drives). The holistic security concept is now rollout to all R&D centers and production sites of the two divisions worldwide. After the project Stefan took over the Product Management for the Industrial Security Services and further coordinated the development of the portfolio. In September 2017 he took over the worldwide rollout of the Industrial Security Services portfolio. Stefan holds a BS in Commercial Economics from VU University Amsterdam (Netherlands) and a MBA from Purdue University.
