

Dr. Angelika Steinacker, CTO Identity & Access Management IBM Security Europe

Angelika Steinacker has extensive Security and Identity & Access Management experience, with 30+ years in security, and 20 years with a focus on IAM.

She had been working for many years as a Security and IAM Solution Architect and Program Manager in a variety of engagements at clients from different industries worldwide before becoming the General Manager for the global IAM competency at her previous employer. She joined IBM nearly four years ago and successfully built up the IAM Competency for IBM Security Europe.

In her current role as CTO for IAM with IBM Security Europe, she is working on strategic topics like IAM for IoT and IAM with and for Blockchain as well as a trusted advisor for clients. She is a regular speaker sharing her expertise and experience on Security and IAM and a member of the global “Women in Identity” group and co-leads the regional chapter. She earned a diploma in Mathematics with a minor in Physics and she holds a Ph.D. in Mathematics with a topic in Cryptography from J. Gutenberg University, Mainz, Germany.
