

STORY SLUG: "At Any Age"

SPONSOR: American Heart Association

FORMAT: Radio :30

JOB NUMBER: BNX101574A3R

SCRIPT

Heart disease and stroke can affect women at any age.

In fact, almost half of women over the age of 20 are living with some form of cardiovascular disease.

I never thought it could happen to me.

Women experience unique life stages such as pregnancy or menopause...

...that can increase their risk of developing cardiovascular disease over the course of their lifetime.

But here's the good news, women have the best resource.

We have each other.
