

# 2018 SCOTTY CAMERON SELECT LINEUP

## Newport

The iconic “three-tier” Newport design is a shorter, rounder blade with a 303 Stainless Steel inlay, and features updated graphics that extend Scotty’s iconic three red dot theme to the face heel and sole.

## Newport 2

With subtle refinements to topline radius milling, the Newport 2 appears slightly thinner from address for a Tour-preferred setup favored by the world’s top players. Up to 30% more vibration dampening material improves sound, as well.

## Newport 2.5

The Newport 2.5 employs softer milling of the flare neck that provides players with  $\frac{3}{4}$  shaft offset and higher toe flow, while incorporating the line’s four-way sole balancing setup and improved vibration dampening material connecting the face to the body.

## Laguna

Scotty’s newest, re-engineered Laguna brings back a popular head shape with 2018 Select line technology, and a new mini-slant neck for enhanced toe flow.

## Newport 3

The heel-shafted Newport 3 brings together a teardrop shaped design with high toe flow. Flange milling has been smoothed for more sculpted contours with updated four-way sole balancing and improved vibration dampening. Also available in left-handed.

## Fastback

The 2018 Select Fastback replaces the Mallet 1’s pop-through alignment features with a single milled flange line giving it a cleaner, Tour-preferred look at address and allowing for additional vibration dampening between the sole and the putter body.

## Squareback

The 2018 Select Squareback features softer contours, subtle shape refinements and a milled sightline instead of pop-through alignment which allows more vibration dampening material to be placed between the putter’s aircraft grade aluminum face-sole and body.
