

Press Release

Lamborghini Aventador LP 700-4 carbon fiber monocoque on display at the European Patent Office in Munich

Sant'Agata Bolognese/ Munich, 19.3.2015 – Automobili Lamborghini has loaned its carbon fiber monocoque rolling chassis, of the Lamborghini Aventador LP 700-4, to the European Patent Office of Munich, Germany for a special event also attended by Luciano De Oto, Head of Advanced Composite Research Center.

The rolling chassis exhibition highlights the leading edge position that Automobili Lamborghini holds in carbon fiber composite materials technology, and is testimony to the many years of liaison between Lamborghini and the European Patent Office (EPO).

The EPO is an intergovernmental organisation through which Automobili Lamborghini has applied for numerous patents, including those related to the production processes of carbon-based materials such as Forged Composite®, CarbonSkin®, and CarbonFlex® and other innovative technologies on the Aventador LP 700-4.

The monocoque of the Lamborghini super sports car is "single shell". Different to other solutions, it combines the cockpit, floor, and roof of the car in a single structure, ensuring high torsional stiffness and thus maximum performance in terms of dynamic behaviour and passive safety. The monocoque module weighs only 147.5 kilograms.

Automobili Lamborghini is the only automotive manufacturer that manages the entire process of carbon fiber machining internally: from the 3D design to the computerised simulation, production, testing and quality control and repair service by Flying Doctors, all taking place within an ultra-modern industrial process of the highest quality.

Automobili Lamborghini S.p.A.

Founded in 1963, Automobili Lamborghini is headquartered in Sant'Agata Bolognese, in North-eastern Italy. The Lamborghini Huracán LP 610-4, which made its world debut at the Geneva Motor Show in 2014, is the successor to the iconic Gallardo and, with its innovative technology and exceptional performance, it redefines the driving experience of luxury super sports cars. The Coupé and Roadster versions of the Aventador LP 700-4 are the new benchmark in the world of luxury super sports cars with the V12 engine. With 130 dealerships throughout the world, Automobili Lamborghini, in half a century, has created a continuous series of dream cars, including the 350 GT, Miura, Espada, Countach, Diablo, Murciélago, and limited series including Reventón, Sesto Elemento and Aventador J. The Veneno Coupé, Egoista and Veneno Roadster were produced to celebrate the 50th birthday of the company in 2013.
