

Lamborghini announces the 2026 Essenza SCV12 calendar

The first of four events in the Sant'Agata Bolognese hypercar program will take place in Imola at the Lamborghini Arena

Sant'Agata Bolognese, 22 April 2026 – Lamborghini's Essenza SCV12 programme will return for its sixth edition in 2026, offering a calendar of four events visiting some of the world's most iconic circuits and confirming its status as one of the most exclusive experiences reserved for a select group of Lamborghini customers.

Described as 'the purest track experience', the Essenza SCV12 programme will be available to customers for dedicated 'arrive and drive' sessions, with customers benefiting from official technical support of Lamborghini Squadra Corse and tailored driver coaching from the Sant'Agata Bolognese firm and its factory drivers.

The 2026 calendar will kick off at Imola, coinciding with the second edition of Lamborghini Arena and round two of the Lamborghini Super Trofeo Europe season on the weekend of 9-10 May. Just over a month later, the second stop on the calendar will take place at the iconic Spa-Francorchamps circuit in Belgium (16-17 June), scene of Lamborghini's historic first victory in the Spa 24 Hours last season. Then, it's onto Barcelona on the weekend of 28-29 September. The visits to both Spa and Barcelona will take place in conjunction with the official Super Trofeo Europe tests at the same venues. The final round will take place at Monza, between 23-25 October, as part of the season-concluding Lamborghini World Finals.

The Essenza SCV12 program represents much more than just track activity; it is a truly exclusive club reserved for customers who share Lamborghini's passion for extreme performance and excellence.

First unveiled to the public in 2020, the Lamborghini Essenza SCV12 is an 830 hp, naturally aspirated V12 powered track-day only hypercar, produced in a limited series for a select group of Lamborghini customers. The vehicle embodies the pinnacle of motorsport-derived technology, with advanced aerodynamics capable of generating downforce levels comparable to those of racing cars, with a maximum downforce of 1,200 kg at a speed of 250 km/h. The six-speed X-trac load-bearing transmission, mounted transversely at the rear, is combined with rear-wheel drive.

With the Essenza SCV12 program, Lamborghini continues to offer a unique experience in the global automotive landscape, encompassing not only track driving but also privileged access to an exclusive environment in which technology and performance blend seamlessly.

2026 Lamborghini Essenza SCV12 Calendar

May 9-10 - Imola (Italy)

June 16-17 - Spa-Francorchamps (Belgium)

September 28-29 - Barcelona (Spain)

October 23-25 - Monza (Italy)
